THE MIAMI UNIVERSITY
YMCAY-WCA
FOREWORD

In spite of what you may have heard concerning the artificialities of college, your four years at Miami will smack of all the pleasant, bright and sober realities of life. There will be moments of pleasure and good times, for such moments are essential to well-rounded living. There will be moments of disappointment, moments of the unpleasant, and moments of good, hard work. Most important of all, however, is the fact that during those four years you will be laying the foundation of your career as a world citizen. Technological advance is increasingly demanding that managers, economists and engineers be highly trained. The arduous and difficult problems of adjustment in the post-war era will be tossed at the feet of the well trained student, for the stake of youth will be high in the building of a peaceful world.

You are one of the fortunate who will be afforded an opportunity to prepare for the tasks ahead, but at present we have to help you with your immediate task of adjusting to college life.
THE PRESIDENT'S MESSAGE

Why should young men and women be in college if times like these? Why did President Roosevelt urge all who are qualified for college education to continue this education till their coun-
try calls them? Because our colleges and universities are great training camps in which the best talent of the country is being instructed at accelerated speed for a vast conflict of tech-
nicians and specialists.

The safest passport to promotion in the armed services is a college course well and faithfully done. Only with trained chemists and physicists and production managers can our war in-
dustries turn out the immense volume of power machines and precision in-
struments the country must have. A million civil service appointments open their examinations to college-trained people. Educated men will eventually write the terms of peace.

The fact that you receive this booklet indicates that you have made a decision, have determined to develop your powers of thought and character and leadership to make the largest possible contribution. Don't be daunted by this decision. We esteemed rather if having undertaken this road you would go along, the pathway and do not give up your best effort.

We bid you welcome to the campus of this community, where you will find a rich and wholesome college life. This campus life may be more com-
plex than In years of peace, but it is still college life and is good.

A. H. Upham, President.
"There shall be a University, established and maintained, designated by the name and style of The Miami University, for the instruction of youth in all the various branches of the liberal arts, sciences, for the promotion of good education, virtue, religion and morality; and for conferring all the literary honors granted in similar institutions." And so it was that in 1839 this present tradition-steeped university was founded. The beautiful site upon which Miami now rests was furnished by the General Assembly of Ohio.

"Old Miami" can boast a sturdy but short-lived life, for along with the War between the States came great financial difficulties to the school. Hence in 1873 the great portals were closed, not to be reopened until 1885, at which time women were admitted to the Institution. "New Miami" headed by Dr. McPartland continued to expand. The School of Education was established in 1903 and in 1942 the schools of Business Administration and Fine Arts were established.

Among Miami's famous men was Benjamin Harrison, who was grad-
On homecoming eve the freshmen hold in 36 to 48-hoc bon-fire on Cook Field out of boats, telephone poles (disconnected), old char's, and anything else that will burn. The whole student body turns out for this affair to sing, hear speeches, listen to the band, and watch an effort of the visiting team burn.

May Day, one of the most impressive occasions Miami has, is held every year on or about the first of May. This is the time when the new members of the women's honorary, Cowen and Mortar Board, are tapped, new house chairmen and new counselors are recognized, the May Queen chosen from the senior women is introduced, and each freshman women's dorm puts on a skit or some form of entertainment.

Begun on the library steps on Mother's Day eve, the interfraternity song is one of Miami's outstanding traditions. First vier with frat in trying to present the sweetest music for the mothers.

These numerous traditions are what constitute the Miami Spirit. Each new class does its part to keep the Spirit high and each class will in its own right go down in Miami's history.
Harrison Hall, or Old Main, the first building erected on the campus, houses the language, speech, sociology, and psychology departments. Here too is the Towers Theater, where those with dramatic talent receive training under the direction of the speech department, and the Varsity Book Store.

Beeson Hall is the center of the University. Here are the offices of the administrative heads. The weekly assemblies, various lectures, and the major dramatic productions are also presented here.

Bruce Hall is the special property of the geology and zoology majors. Here each department has a museum open to the public. In addition to its classrooms and labs.

McGufley Hall, named for the famous author of the still more famous "McGuffey reader," is the haunt of education students. The offices of the Dean of the School of Education are located in this building.

Irving Hall, named for one of Miami's former presidents, houses
one of the newest college chemistry labs in the state. In addition, the accounting and statistics labs are found here, along with the secu-
tarial studies department.

Irvin Hall holds departments of the School of Business Administration and the office of the Dean, along with many of the departments of the Liberal Arts College. In the bas-
ment of this building are found the offices of The Miami Student, Re-
cenato, and "M" Book, student publications.

The Industrial Education Building is the realm of ambitious printers who hold sway in the printing de-
partment. This three-story, fireproof structure also houses the mechanical drawing, wood and metal working, and automobile instructions depart-
ments.

McFarland Observatory is marked by the twenty-sixth refracting teles-
cope on its roof. Dr. Anderson, pro-
tessor of mathematics, has charge of the Observatory which is often open to the students on clear nights.

Herzen Gymnasium is the girl's gym. During the winter season ath-
letic classes are held here regularly, and on rainy days in the fall and

spring, the girls come here for danc-
ing. A new feature of the gym is the bowling alleys which were in-
stalled two years ago.

Withrow Court, a well-equipped gymnasium, in the center of area's athletic activities at Miami. Here, too, situa-
ted for the most part, are the pool, programs and basketball games. Commencement ceremonies are also held in Withrow Court.

Oxford College, with its wealth of atmosphere and tradition, was until 1938 Oxford Women's College. Now it is Miami's largest freshman women's dormitory. Andrews and Blanchard, smaller, adjacent dorms are flanked in the Oxford College area.

Euet and West Halls are twin fresh-
man women's dorms. The court be-
tween them is an ideal spot for a con-
tinue rounds that fraternal

life give to celebrate pi plants.

Hephzibah Hall, the oldest women's dormitory on the campus is used by freshman women. The offices of the YWCA are located here.

Bishop Hall, is an upperclass wo-
men's dormitory. The Dean of Wo-
men lives in this dormitory.

Wells Hall, an upperclass women's
dormitory, is popular in the spring for its sunbathing perch.
North and South Halls are the new, modern dorms for upperclass women. The Sorority suites and Pan-Hellenic offices are in North and South.
Stoddard and Elliot, the oldest dormitories of the campus, were remodelled in 1938. They are upperclass men's dorms.
Ogden Hall is a dormitory for upperclass men. In Ogden is the Pink Room, used by many men's organizations for a meeting place. The offices of Arthur C. Wukelich, director of religious activities, and Bob Gensch, V.M. secretary, are also located in Ogden.
Fisher Hall is a freshman men's dorm often referred to as the "Country Club" because of its spacious grounds. The botanical gardens adjoining supply cut flowers for the dormitories dining tables as well as corsages for the dances.
David Swang Hall is a freshman men's dorm distinguished by its illuminated tower and dome.
New Freshman Men's Dormitory is just that—the new dorm for freshman men—modern in every detail, even to a phone in each room.
The Athletic Field House is named for girls' athletic classes in the spring and fall.

The Bell Tower is located in front of the Main Building and contains the bells that ring out the quarter hour and announce the end of each class period.

STUDENT UNION

The need for a student center at the Miami campus has been recognized for a long time but no immediate action was taken until last year when the Class of '41 lighted the spark by voting its entire class fund of $250 for a Student Union building. To give body to this idea and assure continuance, the Student-Faculty council provided for a standing committee, which drew up a constitution outlining the aims of the committee, so that the interest and experience of its present members following its publication may be maintained and in turn perpetuated by succeeding students.

The constitution declares that the purpose of the committee shall be to encourage the students to show an interest in and to make contributions toward the erection of a Student building on the Miami campus and to cooperate with the Alumni in raising funds for the building.

Miami has been growing with great strides now, a dormitory, and new plans for a new science building, but with the cry for more room one important phase has been overlooked—room for the University as a whole to relax together and to welcome its alumni. It should also serve as a center of campus organizations—student dormitory offices of all student activities for more unified, efficient work. There should be lounge and recreation rooms for committees, classes and student organizations. Popular and interest and pleasure deservers to be brought closer to the total. Faculty rooms would also be housed here, as well as alumni headquarters.

Following the lead of the Class of '41 in their contribution, Omicron Delta Kappa, men's national service honor society, contributed the proceeds of their spring carnival. This fund has been increased in government loans which in turn will revert to the Union building. Students will not be asked to give direct contributions, but through the organization's buying bonds and

MAMI UNIVERSITY
participation in such activities that will contribute to this fund, they will give.

The committee realizes that during this war period, such a building cannot be built. But with the attitude of the government towards such welfare as post-war projects, we hope to have sufficient funds to ask for government aid. The Student Union project is based on long-term planning. The first bricks won't be laid this year, nor the new, but after the war it will be the type of project that will be used by the government to absorb the unemployment.

Entertainment on the campus is high. Students and faculty realize all the need for such a center. It could serve as a great unifying force on the campus, and bring together many groups that should cooperate in making this University a place for even greater student growth and development of character.
SCHOLARSHIP

Almost every student leaves the University with a high degree of influence upon you as a college graduate. Your future employer will demand to know your achievements as a scholar—achievements which are permanently recorded in the registrar's file. In the past this has been generally true, in the future it will be even more so. The world is increasingly demanding experts who are well equipped to handle technical problems. Your record acquired at Miami may greatly affect your entire future.

Well Rounded

The ideal student is well rounded. Social life is essential to effective living, and activities play an important part for many students. But to achieve the maximum amount of benefit from college, scholarship must be fundamentally stressed. Scholarship isn't to be confused with slothful cramming far into the wee hours of the morning. Rather it is a matter of adequately preparing oneself for a future occupation, and the other elements of college life also are essential in rounding out these years of preparation.

How To Study

Each year freshmen are given the benefit of a series of lectures on effective study habits. Most freshmen will find that they never learned how to study effectively in high school. More work is expected of a college student than of a high school student, and it is essential that the freshman develop effective study habits as soon as possible.

In addition to the series of lectures Miami students are afforded the opportunity of remedial reading course. Each faculty advisor is headed by a faculty adviser who is anxious to aid the student in adjusting himself to college life and solving the problems of the immediate future. Whatever the problem your advisor should be consulted first. If he cannot directly aid you he can direct you to the proper agencies.

Vocational Guidance

Often a student will find himself in the wrong field of preparation, and as a result of lack of interest or ap-
tude, will find himself doing inadequately. For a number of years, a vocational guidance clinic has been in operation on the campus. Under the administration of members of the psychology department, students are given a series of tests geared to determining aptitude and interest. The results are followed by conferences intended to acquaint the student with opportunities and requirements in the various occupational fields. The result is supposed to discover his proper field early. In his scholastic career, time and money are saved and better scholarship may result.

Library
The center of scholastic activity at Miami generally falls upon the library. Many courses require reading that must be done from books held on reserve in the library. Books taken from the reserve department, which is located on the ground floor, must be read in the library. These books may, however, be taken from the library at 9 a.m. but must be returned at 5 p.m. on the following day. Restricted use of reserve books is necessitated by the limited number of copies of each edition and by the great demand for particular copies.

Periodicals may be obtained from the reference desk, located on the first floor in the main reading room. In the case of reserve books, periodicals cannot be taken from the library.

Loan
Books taken from the loan department may be kept by the reader for two weeks. More than 150,000 volumes are contained in the loan department. Use may be made of the card index or the Reader's Guide in searching for articles or books on a particular topic. The Reader's Guide lists references available in the library under separate topics.
Recent editions of best sellers are usually placed in the rental department of the library. Here the latest novels and non-fiction books may be read for one or three cents a day.

The library contains two large reading rooms supplied with tables and chairs. Usually the reading rooms are well filled, and especially so immediately preceding examination week.

Stacks
Students enrolled in more extensive work are afforded access to the stacks, the library's collection of periodicals and books not on reserve.
THE LIBRARY

Probably one of the most unusual branches of the University is the Scripps Foundation. The library is a repository of works of reference in population problems. Directors of the Foundation, which is located in the library, are the world's leading authorities on population problems. Advanced students in economics are permitted to study population problems under the Foundation's auspices—Drs. W. R. Thompson and P. X. Whipple.

Phi Beta

Most college, of all halls for scholastic achievement is the glittering, but cold, Phi Beta House. The scholar who can pull back his coat and display the Phi Beta badge resists even his proud abdomen can be sure of his echo among the legions of the educated.

There are a few misconceptions centering about this elusive flag. A Phi Beta is not a person who has passed a certain grade in school, but who has graduated in the top 5% of his class. The Phi Beta is not a person who has studied hard but who may believe in having a good time as well, often Phi Betes are grizzled flunkies, Theta players, your book editors or better greases. Probably the achievements of the Phi Beta might be attributed to his ability to correctly apportion his time, acquiring a proper balance between parties and books.

Phi Beta Kappa can be overrated,
However, while it's never a handicap to dangle the little gold key, the student who doesn't make Phi Beta K is by no means condemned to eternal damnation. Success is composed of a myriad of abilities and even scholarship, the ability is not entirely determined by membership in Phi Beta Kappa.

Founded in 1776 at William and Mary College, Phi Beta Kappa is the oldest Greek letter society in America. Membership is based upon both scholarship and character, and election is limited to college juniors and seniors. To be elected in his junior year a student must possess a scholastic average of 3.75, or three-quarters A and one-fourth B or better. In the senior year a student must possess a scholastic average of 3.35 or better. All told there are 143 active chapters of this fraternity in America. The Miami chapter was established in 1921, and at the present time there are approximately 72 active members on the campus.

Phi Eta Sigma

Phi Eta Sigma, founded at the University of Illinois in 1922, is a national scholastic honorary for freshman men. Eligibility is entirely dependent upon scholastic achievement. Freshman men who have acquired a 3.5 average—half A and half B—for the first semester are eligible for membership. Men who fail to obtain a 2.5 average the first semester, but who acquire a cumulative average of 3.5 for the whole year, may be elected at the end of the year.

Membership to Phi Eta Sigma is one of the highest achievements open to any student, to his classmates and to the faculty that such high scholastic attainments are within grasp. Phi Eta Sigma is often referred to as the little brother to Phi Beta Kappa, for members of this honorary are pointing toward Phi Beta.

Kappa Delta Pi

Schoolmasters and masters of tomorrow gain practical experience through membership in this organization under the guidance of Dean Ashbaugh. Here the practice teachers learn first hand the proper answers to problems that arise in the teaching field. Requirements for membership to Kappa Delta Pi are a B average in the School of Education.

Kappa Psi Kappa

A scholastic average of 2.5 is required for membership in this national education honorary for men.
Under the leadership of Dean Ash-
ough, the men discuss, with fiery
vigor, their views concerning educa-
tion and life in general.

SCHOLASTIC REGULATIONS

Grades for all students are reported to the Registrar's office at the middle and again at the close of each semes-
ter. Letter grades are used as fol-
lores:

A—Indicates excellent work and carries a weight of four credit points for every credit hour in the course concerned.

B—Indicates good work and carries a weight of three credit points for every hour in the course.

C—Indicates average work and carries a weight of two credit points for every credit hour in the course.

D—Indicates poor work and carries a weight of one credit point for every credit hour in the course.

F—Indicates a condition in the course and carries no credit points.

NOTE: Service courses in physical education yield credit points for freshmen and sophomores only. Courses in music, physical education, yield full credit points for music and music education make only; for other students they count two credit points per hour passed, regardless of the grade.

Probation

A freshman who has not earned at
least 12 credit points on all his work by
the second term, or by seniority, and has not earned at least 24 points, may be placed on probation by action of the Academic Council. In such a case the
parent(s) or legal guardian(s) must
be notified of the student's status.

A student once placed on probation may be dropped at any subsequent time if his grades fall below the pro-

tention standard. A student dropped for scholarship must remain out for one full semester, after which he may return on prob-

ation. If he does continue work else-
where during the semester of his ap-
ppeal, he may receive credit at Stanislaus University for such work up to the limit of the number of hours passed in the semester preceding his appen-

dation. Such credit must be validated by examinations, taken here with the approval of the student's committee of

A student who has twice been drop-
ped for low scholarship will not be re-
corded.
A student must earn 45 points in the work of the freshman year in order to return as a sophomore. A sophomore or junior must earn 15 points in order to return the following year.

A student who is dropped for scholarship in June may be given the privilege of attending the summer session, provided: (a) that he has earned at least 45 points for the year if he is a freshman, or at least 56 if he is an upperclassman; (b) that in the second semester he has met the probation standard of 15 points for freshmen, or 26 points for upperclassmen.

Summer Session

Any student who earns himself of this privilege, and earns six hours of credit in either summer session in courses which he has not previously taken with a grade point average of at least 2.0 may return on probation for freshman or sophomore year. If he has been dropped for scholarship, may even, remains on his record and a second suspension is permanent.

A student entering the summer session on probation will be dropped for scholarship at the close of the summer session if he fails to earn a C average or better.

A student returning after an absence from the University must re
A student withdrawing between the mid-term grade report and the close of the semester may not be admitted to the following semester's work except with expressed approval of the Committee on Admissions.

CLASSES

From the first day of classes to graduation day your school life will center around going to class and studying for classes. A film initial start will carry you farther in your studies than anything else you may do. For instance, there is this matter of getting in class on time. If you are punctual, the professor will have a good impression of you. Combing in late not only breaks up the lecture, but it is embarrassing.

Taking notes is an art, and it will be well for you to go to the "How to Study" lectures for the details. A few general suggestions are offered, however: (1) Keep the notes for your different classes separated. (2) For the main point down clearly, then fill in the details. (3) Ask questions if you do not understand; after all you are paying to learn. (4) Remember the professor is human, and he will appreciate a genuine interest in the subject outside the class. "Apple polishing," however, is easily detected and is disliked by all professors. At this point perhaps a few quotations from the University catalogues concerning classes and grades might be helpful.

1. Every student is expected to attend all classes; if he does not he is liable to disciplines unless he has acceptable reasons for each absence.

2. Whenever a student is specifically reported in writing by an instructor as being absent from class to such an extent as to make his own work inefficient or impair the morale of the class, the adviser shall drop the student from that course with a grade F.

3. Absence caused by authorized trips from home for athletics, debate, or other activities under the direction of a member of the faculty will be canceled.

4. Absences from classes due to confinement in the hospital for sickness or on order of the University physician are canceled. Absences oc-
5. (a) When the uncancelled absences from any course of a student who is in his first semester of residence at Miami (whether freshman or upperclass transfer), or any other student whose average for the preceding semester was below C exceed the number of semester hours of credit allowed for that course, such a student shall be dropped from the course with a grade of F.

(b) When the uncancelled absences from any course of a student whose average at Miami for the preceding semester was between C and B exceed twice the number of credit hours in the course for the semester, such student shall be dropped from the course with a grade of F.

(c) Reinstatement can be secured only upon recommendation of the instructor and adviser; and a student reinstated under the operation of this rule shall be permitted no further absences from the course in which he has been reinstated.

(d) When the uncancelled absences of a student exceed twice the number of hours for which he is registered in any semester, such absences shall be dropped from college. He may re-enroll only with the consent of the Committee on Admissions.

(e) Any student who receives a B average or better for the work of any semester is exempt from the operation of the various provisions of rule 5 during the following semester. This privilege, however, may be withdrawn from any student who, in the opinion of his committee or advisers, is abusing it.

(f) Absences incurred the full day preceding and the day following a holiday shall be treated in the operation of rule 5; provided, however, that no student shall be charged with triple cut for more than one consecutive absence from the same course, unless the holiday intervenes.

5. Because of limited seating capacity of the Auditorium students are required to attend only a part of the regular student assemblies, including monthly Monday evening vapors (four or five a semester as announced). Failure to attend the required number of programs in any semester will re-
suit in the addition of one semester hour in the total graduation require-
ment. Students with a B average are not exempt from assembly attend-
ance.
2. Failure to keep appointments with University officials may be re-
corded as uncancelled absences accumulating at the rate of one per day
beginning with the hour of appoint-
ment missed.
"THE LIVELY ARTS"

Believing in the value of the well-rounded personality, Miami University offers ample opportunity for pursuit of the Arts and development of the "fine things in life." A variety of activities are open in music, dramatics, forensics, and general culture knowledge.

Band

For the music-minded there are organizations both instrumental and vocal. The University Band is under the direction of A. I. Lekvish. The marching band, which plays for the football games and included 54 pieces last year, is composed of 34 students. Freshmen who have played in high school bands should contact the band director about the opening tryouts in the fall. Experienced drum majors and majorettes also have a chance to "try their stuff" with the band and should report when tryouts are announced in the "Gargoyle." Besides playing on the campus, the band occasionally makes trips with the football team to various college games in Ohio or to special events such as the great Kentucky Derby in Louisville, Ky.

There is also the symphonic concert unit which organizes after Thanksgiving. Its chief service function is playing at basketball games. On Sunday evenings in May concerts are occasionally given in the Quadrangle, and a formal concert is presented every spring. There are eighty pieces in the concert group.

Orchestra

Miami's orchestra is especially fortunate in having full symphonic proportions and instrumentation, as well as a group of very talented musicians under the direction of the nationally known composer and Dean of the School of Fine Arts, Dr. J. W. Labelle. Series of concerts are given throughout the year, consisting in the main of annual spring concert. Concerts feature various sets of music and equipment, such as the famous Boston Symphony Orchestra of the leading musical groups of its class.

Madrigal

No matter whether you sing high C or low G in between, you are eligible to try out for the Madrigal, the all-freshman choir, which is under the capable direction of Miss Does Lyon. Madrigal gives numerous concerts during the year, and in the spring,
with bag and baggage, the members go on a concert tour. Tryouts are held early in the fall.

Minnesingers

For men and women who enjoy singing together, Minnesingers has been organized under the direction of Dean J. W. Clokey of the School of Fine Arts. This group gives concerts during the year as well as aiding other groups in their programs. Minnesingers present many of Dean Clokey's own works.

Glee Club

Men who prefer rumbustious baritones and melodious tenors without the aid of sustaining trills from the soprano will find the Glee Club to their liking. Members are chosen after individual tryouts by Mr. George Barron, director. Highlight of the Glee Club's season comes in the spring when they go on tour, singing at high schools throughout the state.

Dramatics

For those who are interested in stage art and theater, there are more than ample dramatic opportunities. Each year the speech department presents three major Benton Hall productions and from five to ten minor plays in the Towers theater. Freshmen are eligible along with upperclassmen to try out for parts in either group. The Benton Hall productions usually include one Shakespearean production, a melodrama and a farce of the modern Broadway type. The Towers theater plays this year sought to portray the history of drama, from Sophocles and Shakespeare to Ibsen and MacLeish.

However, would-be Thespians who fail short in dramatic ability may find
opportunity for achievement in make-up, electrical work, properties, and publicity work. Those who distinguish themselves their first year are chosen for membership in Freshman Playgoers. A small number of those who continue to achieve recognition in the field of dramatics are selected for membership in "The Students' Players."

Speakers' Bureau

For those interested solely in the field of oratory, Speakers' Bureau presents an opportunity to "pop off" concerning your pet have, hobby or hobby. Members are sent out to high schools, luncheon clubs and church groups in the vicinity of Oxford and acquire much valuable experience. Par would be excellent data if you are interested in oratory, especially at Christmas, to tell stories or recite.

Assembly

If you want your "culture" more as a single listener, then there are still more opportunities. Assemblies are scheduled regularly for 11:15 a.m. on Thursdays. Since the seating capacity of Benson Hall is limited, pre assembly attendance is required for each session. The programs are of a wide variety, all the way from the eagress anticipated performances of the Canvas Owls and skits by the speech department to talks on "Early Artic Architecture." The musical organizations also perform for the student body. Annual events are the first assembly held in Witherly Court and addressed by some prominent dignitary, the Honors Day assembly, the all-senior assembly and the all-woman assembly. Programs are varied enough that each student can obtain the required attendance without being compelled to sit through a program in which he has no interest.

Lecture Series

Interesting and educational, too, is the Lecture Series, sponsored each year by one of the departments of the College. Last year the nominal fee of $3.00 tickets to five or six lectures can be secured. Speakers are brought from all over the country for the programs. The science department sponsored the series two years ago and presented everything from entomology to crime-detection. Last year the modern business department presented a program of topics relating to foreign lands, with subjects both historic and current. The English department is in charge of
the program for the coming year. Plans have been made to bring a number of famous contemporary writers to the campus.

**Artists Series**

Students are admitted to the series by an admission from the student activity fund. In the past year the City College Symphony, the U. S. Navy Band, John Brakke, the Don Cossack Russian canteen chorus, Zino Francescatti, and Meinolf and Lohman were presented at Waverly Court. Through the Artists' Series Miamis students were given an opportunity to witness well-known famous artists in various fields.

**Listening Hours**

Visitors furnished plenty of swing music for the campus, and provision is also made for those whose tastes run to the classics. Several times a week on a regular schedule, the "Listening Hour" is held in Bishop Zone. A program of classical music by the best symphony orchestras is presented for the edification of the students.
Coordinating all religious activities on and about the campus, the Miami Religious Council serves to offer the student at Miami an adequate religious experience while in college. In his capacity as Director of Religious Activities of the University, Dr. A. C. Wickenden heads the Council which is composed of the University YMCA, the University YWCA, and the various church groups in Oxford. Among the activities sponsored by the Religious Council is the University Vespers, which affords students an opportunity for inspirational services with leaders from off the campus. Also sponsored by the Council is Religion in Life Week—a week devoted to discussing the function of religion in every day living. Last year the Religious Council brought twenty well-known leaders to the campus in connection with Religion in Life Week to spend the full week addressing small and general groups and speaking to dormitory and sorority groups. In this way students were given an insight into the problems of the day.

The following is a list of the churches that are members of the Miami Religious Council and a general idea of the programs they sponsor for university students.

**Presbyterian**

Memorial Presbyterian Church holds services every Sunday at 11 o'clock with the Rev. Elliott Porter as minister. There is also a discussion group which meets Sunday evenings at 6:30 to discuss various religious problems. Under the guidance of the Rev. C. E. Gutierrez, minister to students, the Presbyterian church sponsors the Westminster Fellowship with the purpose of providing students with a religious, educational, recreational religious and social program. The Fellowship is divided into committees, some of which are the worship committee, social committee, Westminister Playes, the "Church Mouse" and discussion committee.

**Methodist**

The Rev. Arthur B. Shedenoff welcomes Methodist preference students to services each Sunday at 11 o'clock, and discussion groups at 4:30 in the evening. Conducting around Wesley House, and with Mrs. Hilda Jane Snyder as student counselor, the Methodist
Church sponsors the Wesley Foundation, a Methodist student fellowship group. The Wesley Foundation is organized into committees with such interests as promoting social functions, publishing the “Megaphone,” and presenting dramatic productions. All those interested in photography may join the “Shutter Pup Club.”

Delta Sigma Theta is a national Methodist men’s fraternity, consisting of good will and fellowship among its members. The group has regular meetings to discuss social issues, religious, and recreational activities for those of the Methodist faith.

Kappa Phi is a national Methodist sorority that promotes religious, social, and cultural development among members through the varied activities that the group undertakes. Meetings are held every two weeks.

Holy Trinity Episcopal church has services at 8, 9, and 11 o’clock each Sunday morning with the Rev. R. 7, Rodgers as pastor, and music by the choir. Breakfast is served in the dining room after the 9 o’clock service. A Sunday evening discussion group meets at 6:30 to discuss religious problems in day to day life.

Cathedral Club is a student group organized on a personal basis, whose purpose is to provide the student with social, religious, and cultural activities while in college.

United Presbyterian

With the Rev. J. L. Thune as minister, the trained Presbyterian church invites students to attend their Sunday morning services at 11 o’clock, the discussion group which meets Sunday evening at 6:30 and the Bible class at 10 o’clock Sunday mornings. The student choir presents the music for the services.

Lutheran

The Lutheran students of the University meet at various times to discuss their religious problems and to promote their social and cultural life.

Catholic

St. Mary’s church, with Father Lawrence as pastor, invites students to services at 8 and 11 o’clock on Sunday. The Newman Club is part of a national organization to keep foremost the social, cultural, and moral aspects of Catholicism. They plan an active social calendar.
with hikes, hayrides and dances, as well as taking an active part in intramural athletics. The group also publishes the "Mid-Neoplan," a local publication giving the news and activities of the church.

Christian Science

Students who belong to the Christian Science church have their meetings in the "Little Theatre" in Hart Kent hall at 3:30 Sunday mornings. Once a year a well known lecturer is brought to the campus to address the group.

Hillel Foundation

The Hillel Foundation is an organization for the Jewish students of the University. The group meets the 3rd and 6th Wednesdays at 5:30 in the North Hall recreation room. Rabbi Henry Rabin is the director. The group publishes the "Hillel Record" once a month, holds discussions, gives dances and plays to raise the social, cultural and religious growth of its members.

THE Y'S

Under student leadership, and with an exceedingly low membership the TWCA and the YMCA on the campus further the religious and social interests of campus life at Miami. The Y's, in cooperation with the University, are very active during Freshman Week helping the new students in becoming oriented to a new environment by sponsoring men's bookers, a mixed mixer, tea, and campus tours. Again acting, cooperatively, the Y's sponsor the Miami Chest Drive, which is usually held in November. The Chest Drive does more than help the University. It also solicits all the smaller donations which were previously necessary to support various Miaml activities, thus eliminating much duplication of effort and enabling the organization to budget their expenditures more efficiently. Leader's Club is another project backed by the YM and YW jointly and is held each Saturday night. Leader's Club offers to the student of Miami a sample of creative recreation in the form of dancing, table games and ping pong. The entire program is in the hands of the students. Throughout the year special parties are planned such as the "Flunkera Frolic" which is held just after the first semester examinations. This "M" Book itself is a project of the YM and YW to give you a preview of campus life at Miami. In connection with their religious program the
VM and YV, as members of the Miami Religious Council, take an active part in Religion in Life Week. It is a program of religious emphasis designed to bring 3,000 Christian phil¬osophy into the realm of the student as psychology, and is held once every two years. This year the VM and YV have become sponsors of the "Tropical Discussion" program in cooperation with the speech department. Speakers on current topics, war problems, and post-war conditions were scheduled throughout the year to discuss these problems with fraternity and dormitory groups. Throughout the year the VM and YV bring to the campus such well known speakers as Dr. Paul Popene, an authority on marriage, to appear before the student body and hold personal confer¬ences and discussion groups.

YWCA

The Miami YWCA provides the women of the University with a varied program according to members of a year of environment activities of vital interest and importance. From September to June the YW has mapped out a complete list of functions for the development of leadership, charac-

MISS EMMA SCHRACHER

ter and religion in the personality of those who take advantage of what it has to offer.

Membership is open to all girls who would like to participate in some phase of the Y work. There are many committees and you may choose as many of them as you wish. An all-
Association meeting will be held about a month after school begins to ca-
plain to you some of the facts about the YWCA, its committees, and their functions.

Behind the entire organization is Miss Erma Stephens, YWCA secretary, a very charming and capable woman whom you will want to meet. You will find her in the Y office in Hephzibah Hall, and never too busy to talk with you. Drop in and get to know her!

To give you some idea of how the YW is divided up into interest groups and how they operate, the committees are outlined here.

Social Service
Do you like to help people? Do you like to sew or knit? This group selects a project, usually one of helping children or young girls in Oxford, with constructive recreational activities. In past years they have helped Negro girls with their high school organizations.

Appreciation
An excellent opportunity for a cultural, creative background awaits you. This committee is interested in learning more about music, painting, or any of the other arts. The members take trips to art museums, listen to speakers whom they invite to talk with them, and share their hobbies with each other.

Girls' Clubs
Do you enjoy working with little children, or other girls' clubs? This committee assists the local high school girls in organizing and running their clubs. They also have some good times on their hikes, picnics, and parties.

Finance
There are the YKI sales girls in your dispensary you'll find helpful and handy—get to know them.

Publicity
If you have artistic or journalistic desires—this is what you will want to work. This committee keeps you posted on Y activities through the LIVE-YER ICE newsletter, posters, and bulletin boards.

Public Affairs
You don't want to miss out on the happenings in the world, especially when events are occurring so far. This committee sponsors speakers.
Student Industrial

Trying to understand and know the industrial girls of their own age is the aim of this committee. They meet with student groups from Western College and Industrial groups from Hamilton and Dayton.

Religious Philosophy

One of the most personal of the Y groups, this committee attempts to deepen one's own philosophy of religion. The girls on this committee direct the Vespers committee.

Art

Whether you are a talented artist or a person who just likes to cut out and paste, the art committee will interest you. This group makes posters and helps publicize both the meetings and the social activities of the Y.

Campus Fellowship

This group helps cutime girls get to know each other and everyone else through teas and informal get-togethers. It is also the job of this committee to keep personally all of the girls who live in cottages.

The Cabinet

This is the executive body of the Y and is composed of the officers and committee chairmen. It is the nucleus that keeps this large organization running smoothly.

YMCA

The Miami YMCA, in addition to its many services, offers through participation in a common purpose an opportunity for character, personality, leadership and religious development. Under the direction of R. H. Cracher, executive secretary of the YMCA, the Y is filling an important part of the campus life by helping men in solving their daily problems and training them to help others. Jack's office is in Ogden Hall. Drop in and meet him. He will be very glad to meet and talk with you at any time.

So that you may better understand the organizational structure and the program of the YMCA, the main departments and their functions are outlined for you.

Freshman Program

Each year the Y begins its activities by inviting about eighty freshman men, selected by their participa-
Freshman Council

The men who compose this group are freshmen who are particularly interested in the YMCA and the work it does. The group promotes inspirational meetings, furnishes parties and provides various types of campus service. The men on the council are selected from the quality of work they do their first semester.

Sophomore Council

The Sophomore Council is a fellowship group which stands ready to promote worthwhile projects on the campus. They furnish helpers for various occasions and assist in the administration in such things as entertaining some one thousand high school students on Scholarship Day.

Junior Council

The Junior Council is a dynamic group which considers many local and Y problems. The group meets periodically to discuss world situations and to aid in the organization of the YMCA. The members of this council also publish the Y Bulletin.

Conferences

Each year the YM and YW take part in various conferences, both in
the campus and elsewhere. The National Student Assembly, held every student generated, was here at MI- student this year. Delegates from YMCA and YMCA groups @ over the country were present. The Y's send delegates to such conferences as the Lake Geneva Conference, Officers Training Conference, Area Student Council Meeting, and the Recreational Conference.

Game Rooms And Book Exchange
Game rooms in Odeon hall, Swing hall and New Freshman dormitory offer students an opportunity to play pool and ping pong in a university atmosphere. Current reading material is available in gift shops and pop are sold. The Book Exchange, located in Harrison hall, buys and sells used books, and also sells candy to students. The exchange of books is a non-profit enterprise as a service to University students. The game room and Varsity Book Exchange offer employment to approximately thirty students.

Religious Emphasis
The YMCA has its entire foundation on a Christian outlook. Its service, activities and discussions are the overt expression of this background, putting into every day life the Christian philosophy of the YMCA true Y, in cooperation with the other members of the Miami Religious Council, helps to sponsor the Twilight vespers held Sunday evenings throughout the year. Speakers from other churches and places of life lecture a good variety of programs.

The Y also sponsors the "Quartet Groups," a group of men on the Y Council who meet each Sunday morning either at Dr. Wickenden's or Bob Guicher's home to discuss religion and youth's attitude and place in life.

Big Brother Movement
The Big Brother movement is one of the Y's projects to help the freshmen prepare for college life. During the second semester, the freshmen, who work with the incoming students, are appointed. These men want to help you in any way they can. You should feel free to ask them any questions you may have and in this way you will be able to learn about Miami from an upper class student of the University. Here is a form inside and you can use it to get some inside information on campus life. Take advantage of it!
ACTIVITIES

Many campus activities, such as music organizations, dramatic groups, and the Y's, have been mentioned elsewhere in this book. These activities hardly complete the list, however, for it is quite natural that a school as large as Miami should foster activities for almost every conceivable interest.

The various campus activities aid in developing qualities of leadership. Honoraries and service groups recognize outstanding achievement in specific or many fields; publications furnish aspiring journalists with an outlet for their abilities; and the Y's promote good fellowship.

Although never so important as classroom work, they are an integral part of college life. They should not be passed by without a thought, nor should one spread his energies too thin in a desire to participate in the activities that make the University whole go round.

Miami activities cover a broad field, both social and service in function. They provide the joy and gaiety that is necessary to offset the seriousness of study and classes. What we have tried to do in the next few pages is
give you a composite picture of these extra-curricular activities and their place in the Miami student’s routine.

Student

Even if you don't know what a galley-proof looks like, wander down to the offices of The Miami Student in the basement of Irving Hall. The staff will welcome you with open arms— and incidentally find plenty to keep you busy.

The oldest college newspaper in the United States, The Miami Student is published twice weekly under the direction of a senior editor who will put you to work counting heads to the satisfaction of a sophomore desk editor. Later there will be stories to cover.

Sophomores hang on the freshmen and learn what it is like to stay up until three in the morning reading galleys or pulling a story out of this air when there is a four inch hole on page four to fill. Each issue is supervised by an issue editor who makes sure the assignment sheets and kudos orders from the desk are all his own.

The Student could not be financed without the business staff. Freshmen deliver papers and persuade merchants that advertising pays. Directing them are the business and advertising managers who fear their hair if anyone extra-eagerly throws away a piece of paper.

"M" Book

Seeking Miami through a Kaleidoscope. That describes the function of your freshman bible. (This is it!) Created personally of this little handbook this summer will familiarize you with college life at Miami. It will be invaluable to refer to during your first few weeks as a freshman.

The "M" Book is planned by students. Editors and business manager are appointed from the previous year's staff by a combined YMCA and YWCA committee. If you'd like to write two to next year's freshmen, compete for a position when the editor announce tryouts for the staff.

Recessio

A call will be put out early in the fall for freshmen who would like to work on the Recessio editorial or business staffs. This will be your introduction to the Miami yearbook. Unlike the Minster, which is a four-year job, the Recessio is edited by juniors. All year the staff slaves away in the basement of Irving watching a Recessio of
In the language department there is the national French honorary Beta Pi Theta. This organization is concerned not only with French language but with French literature and history as well. There is also the German honorary, Delta Phi Alpha, which was established on this campus in 1933. In the Spanish department the honorary to which stu-
dents aspire is Sigma Delta Pi which has done much to increase student interest in Spanish language and custom. Sigma Delta Pi is the classical honorary and is open to all students who have a "B" in Latin or Greek courses. Customarily the membership is divided into the study of Latin and Greek culture. It is open to all students enrolled in Latin or Greek courses.

Among the other honoraries in the Liberal Arts college is Lee Peijus whose purpose is to stimulate thought and discussion on current government. The National Arts Alumni is open to all women at the Liberal Arts college who are English majors and have general B average. Members write and dis-
cuss their own works and also hear lectures on current literary trends at
their monthly meetings. Cosmopolitan Club sponsors discussions of the international situation. Membership is open to all foreign students and other students interested in foreign affairs. In the sociology department is Alpha Kappa Delta honorary which sponsors lectures and keeps its members in contact with present day work of sociologists. Psi Chi, national psychology honorary, encourages general scholastic excellence and stimulation of an active interest in practical psychology. For speech majors, there is Tau Kappa Alpha, an honorary for those who have shown ability in debating and public speaking. Epsilon Pi Tau is an organization for those who are outstanding in the field of industrial education. Seniors and juniors are eligible if they meet scholastic requirements.

For the student whose interest tends toward the scientific side, there are several different honorary which offer excellent opportunities for knowledge outside of class. Sigma Gamma Epiklesis is for those who enjoy gazing on rocks and exploring the mysteries of any countryside and who get a B average in geology. Sigma Pi Sigma is open to honor students in physics, mathematics and
chemistry. Phi Sigma is for those undergraduates who do exceptionally good work in zoology, botany and geology.

In the School of Business Administration are two honororgreek

Combs and Delta Sigma Pi. Combs, a local honorary for women, encourages active interest in current business problems and a high standard of scholarship for its members. Membership for Delta Sigma Pi, national professional business fraternity, is based on business interest and scholarship.

The Freshmen is composed of colored students at Miami. It is organized in 1926 for the purpose of creating better feeling between the races and to discuss current racial problems.

Delta Phi Delta, art honorary, is open to all art majors with a B average. It sponsors annual art exhibits and panel discussions.

The home Economics Club is limited to sophomore, junior, and senior women of the home economics department who can meet the scholas
tic requirements.

The Association for Childhood Educa
tion is an organization for students interested in elementary education. At the meetings members discuss educational problems and have prominent authorities as speakers.

The brothers of Phi Mu Alpha Sin
dora, national professional music honorary, are authorities on all types of music from classical masterpieces to modern swing. The national mu
tic honorary society, Delta Omicron seeks to attain the highest degree of musicianship possible in the organiza
tion and to promote appreciation of American music and musicians.

Women's League

As the name implies, the Women's League is composed of every Miami woman. It is a national organization which serves as the women's govern

Society association on the campus. House
callers of dormitories, the president of the women of each of the four classes, the presidents of the various women's committees and departmental clubs and the president of the Pan
calbete association represent the wo

omen on the council of the League.

One of the first functions of the year comes during freshman week when the League sponsors mixer for the freshmen and serves punch and cookies. Later in the year comes the
"backward dance" when girls not only ask dates to go, but also foot the bills, call for the beer, and even give the boys carrots made of onions and other vegetables. A lean fund exists for girls who get desperate for money, as many do, especially right before a vacation.

Women's League operates a point system, originated several years ago by Mortar Board, which serves as a system to distribute campus jobs among the many instead of the few. Points are allotted to various offices, and no EII may have more than ten points. The women's class presidents have charge of the carrying out of these regulations.

Student-Faculty Council
Composed of six members of the faculty and six men and six women students, chosen at the campus elections in the spring, the Student-Faculty council acts within limited jurisdiction. All proposals approved by the Council are recommended to the administration for final judgment.

Among the Council's jobs are the apportionment of funds to student activities and supervision of all student elections. Freshman elections, held the sixth or seventh week of the school year, are directed by the Council elections committee. The chairman of the Council acts as the executive officer of the freshman class until freshman elections.

To keep freshmen informed of the Council's activities, the president and one other member of the freshman council represent their class as non-voting members of the Student-Faculty council.

Council meetings are open to the student body and members will consider any questions advanced by students.

Owens
For freshman girls who are outstanding in scholarship, service, leadership and character the culmination of the year's activity comes on May Day when the new members of Owens are tapped by the old members. During their sophomore year Owens sell flowers at football games, assist the Mortar Boards in several projects, present a scholarship cup to the freshman girls' dorm, with the greatest improvement in grades, and most of them serve as counselors in the freshman dormitories.
Mortar Board
Mortar Board is proud at the end of
the rainbow for senior women who
have starred at activities and grudges
for three years. The members are
tapped at the end of their junior year.
on May Day, Mortar Board gives tea
for the freshmen of each school and
a tea for upperclass women.

ODK
Omicron Delta Kappa, national
men's honorary, taps junior and senior
men each year for outstanding schol-
arship and participation in campus
activities. Every other year ODK
sponsors a carnival.

The Traveling Library
This answer to any bookworm's
prayer was started way back in 1937
when the Student-Faculty Council de-
cided to donate one thousand dollars
for the causes. With that money a
small, well-chosen library of books
was bought, and more books have
been added each year. The books are
distributed among the dormitories and
fraternity houses, and then reshuffled
each six weeks so that everyone has
a chance to read them all.
DANCES

Like any other university, Miami has its array of big dances for those who like to push silver slippers over smooth dance floors.

Four important dances head the social calendar—the Freshman Seren, Sophomore Seren, Junior Prom and the Senior Ball. Freshmen choose their own committee members who handle the arrangements for the Seren which is usually held in November. Only freshmen, or upperclassmen with Freshman dates, are admitted to this dance. The other dances are open to all the student body, however. It’s advisable to get dates well in advance for these dances, for otherwise the girl in your dreams might belong in the arms of another Romeo.

In addition to the big dances, there are numerous other dances. Early in the year the Pan-Hellenic Council sponsors a dance to which all the sorority women drag the men of their dreams. Meanwhile each fraternity throws one formal dance the first semester in addition to open houses almost every weekend.

Starting early in the year, the Variety Social Club holds a dance almost every Saturday night in McGuffy gym. The Campus Clubs, traditional University dance bands, often play for these Variety, as do other popular bands. Between semesters the Variety shows a "Pumpkin's Pride" for flappers and Phi Deltas alike.

Like the Variety, Levee Club, sponsored by the Y's, is held almost every Saturday night in Haven gym. Here, without the radiances of admission prices, couples may dance, play cards and ping pong. Other dances are the Interfraternity Ball and Triton. Being a small town, Oxford doesn't afford the dazzling social life of a larger town. Instead the organized social life, under the supervision of Mrs. Virginia K. Skinner, provides a wholesome opportunity for students to relax after a week-end of the old grind.

DATES

Dating has no place in the social life on every campus. House or later we all get the urge to have a date. The main thing to remember is that it is just a part of college, and have a good time. Whenever you do find that you have a little spare time on your
bands, and would like to get a date with that smooth blonde in your zoology class or that handsome creature in your composition class, you might be interested in the kindly advice to follow.

How To Get One

Getting the date: There are several methods in good standing at Miami. The first and most obvious of these is just to go up to her and introduce yourself, and then gradually work up to the question of what she is doing Friday, second, and most common of all methods is to find someone she knows who can "fix you up." If you are really at a loss as to how to meet her, or perhaps you are just a little shy, you can always call her on the phone. And if none of these work, you are perfectly free to try any methods of your own which have brought you success. Miami is noted for its informality.

What To Do

When you finally do get the date, be sure that you know her name and where she lives. When the big night arrives get to her cottage or dorm on time, even though you will have to wait a half an hour for her. Remind her to "sign out" at the desk before leaving. Nine times out of ten it will be a coke date or a girl who can wear just about anything she chooses. Suits, sweaters and skirts and sport dresses are worn on most dates. For weekend dates or a Yardley dance you can wear that attractive dress which you bought for just such an occasion.

In case you grow tired of coke dates or open houses, you might go bowling, and there's always a good movie showing at one of the local theaters. When the weather is sore you might like a round of golf, or perhaps a long walk along the Palavanks. Whatever you choose to do, remember to get your date back on time. Remind her to "sign in" as then hurry back to study.

SORORITIES

Sorority life on Miami's campus isn't quite like that of other campuses. In fact all girls live in dormitories or cottages, and sorority suites are used only for meetings and social affairs. With this arrangement, it is not necessary for a girl to join a sorority.

During rush week, when all fem-
Mrs. BOOK
MIAMI UNIVERSITY

Jane's talk is about sororities and everyone is rushing hither and yon to sorority meetings, overlooking the most important thing on earth, and they are important. They offer unique
opportunities for leadership and an affiliation that lasts after graduation.
Yet, they are not as important as they might seem during the first
weeks of school. Success in college does not depend upon belonging to a
sorority.

All rushing is under the supervision of the Pan-Hellenic council and any
questions about a sorority should be directed to the Pan-Hellenic office in North
Hall. Pan-Hellenic is an association for the purpose of coordinating the
interests of all sororities on campus, helping them in cooperation with the
University. Each sorority has representation in Pan-Hellenic, which is a
national organization.

Sorority Rush Rules

1. Registration
   A. An informal Pan-Hellenic meeting
      for new students will be held on
      Friday, September 18, 1942 at 4 p.m.
      in Benton hall. At this meeting the
      Dean of Women will explain the soro-
      rity system for membership selection,
      and will answer questions concerning
      it.
   B. Registration of women interested
      in participating in sorority life will be
      made at this meeting. No fee will be
      charged for registration.

   Headquarters for later registration
   will be the Pan-Hellenic office, 191
   North hall. Registration will close
   on Friday, September 25 at 4 p.m.

2. Schedule
   The rushing season will start Satur-
   day, September 19, 1942 at 7 p.m. and
   will close on Saturday, October 3, 1942
   at 10 p.m. Rushing will be confined
   to the hours specified below.

   First Period—Saturday, September
   19, 1942 open houses will be held in the
   sorority suites or in residence hall liv-
   ing rooms from 7 p.m. to 9 p.m. During
   the first period a girl may attend
   as many of the open houses as
   she desires to attend, staying only
   fifteen minutes at each one. No per-
   sonal invitations are necessary.

   Second Period—Tuesday, September
   22, 1942—4 p.m.-6:30 p.m.

   Girls to be held in sorority suites,
   residence hall living rooms, or in pri-
   vate homes.
Thursday, September 24, 1942—4:00 p.m.-5:00 p.m.  
Friday, September 25, 1942—7:30 p.m.  
Saturday, September 26, 1942—7:30—10:00 p.m.

During the second period a rusher may accept only two dates with the same sorority.

Third Period—Tuesday, September 28, 1942—4:00—5:30 p.m.

This is to be held in sorority suites, residence hall living rooms, or in private homes.

Thursday, October 1, 1942—4:00—5:30 p.m.
Saturday, October 3, 1942—7:30—10:00 p.m.

During the third period a rusher may accept two dates only with the same sorority. There shall be no split dates during the second and third periods. No banquets are permitted.

FRATERNITIES

To the freshman whose main goal in college is hitching his wagon to a fraternity we have a bit of advice—pick your bags and go home. College has no place for the fraternity man who incidentally goes to college, and most fraternities find such members a drag to the club. Fraternities do have their place on the campus where viewed in the right light, however, for they afford men an opportunity to further the art of getting along with diverse personalities. Too often, however, men living in such close contact fail to become typed. When this happens each man loses the opportunity to develop fully his own personality and becomes just another frat club boy.

There is really nothing glamorous about belonging to a fraternity. On the Miami campus it is not the least bit necessary, socially or for any
If you feel that you can live with other men in a single house and still maintain high scholarship and your distinct personality, then join a fraternity. If you can meet the financial obligations and care to do so, otherwise pay the fines, for there is more to college than sticking a pre-
mail with Greek letters on your mail.
Each fraternity on the campus maintains its own house and a board-
ing club. Four of the eleven frater-
nities were founded on the Miami campus, and three of them are known throughout the country as the Miami Triad. First campus west of the Alle-
ghenies to have a representative of the better letter societies, it is little wonder that Miami is called the "Mother of Fraternities.

Fraternity Rule:
The following are the rules govern-
ing both freshmen and fraternities in regard to rushing and will be enforced by the University.

A. The making period shall begin the first Monday of the second sem-
ester.

B. The daily rushing period shall be from 7:30-11:30 P.M., only with the exception of the Saturday noon when pledge vows may be accepted.
(1) Split dates shall begin at 8:00 P. M.

(2) Dates shall not be split more than two ways.

C. All freshmen shall be excluded from fraternity property until the beginning of the official period for rushing.

D. There shall be no cars used for rushing while school is in session the first semester, or during the designated rush week.

(1) No freshman shall be present at any local organized fraternity gathering during the first semester.

E. Fraternity upperclassmen are forbidden to enter freshman dormitories for the purpose of making rush dates, or rushing until the beginning of the official rush period, except as provided below.

During the designated period of one week—the period to begin on the Monday evening after the issuance of the nine-weeks grades—the officers and chairman of each fraternity, and two assistant rush-chairmen, shall be permitted to enter freshman dormitories for the sole purpose of making dates between the hours of 9:30 and 11:00 P. M. Saturday night excluded.

F. There shall be no out-of-town rushing at any time while school is in session.

G. A freshman shall have obtained at least 24 hours on the work of the semester immediately preceding to the rushing period to be eligible for rushing and pledging. A freshman who fails to acquire the necessary 24 points the first semester shall become eligible after the issuance of the nine-week's grades of the second semester, provided the report indicates that he is making 24 points or more, and provided he is not on academic probation.

H. There shall be no rushing in freshman dormitories after 10:00 P. M. any night during rush week.

I. On or before October 26th, each fraternity shall place a fifty-dollar bond with the advisor to fraternities. This bond is to be forfeited wholly, or in part, upon the conviction of a violation of any one of these rushing regulations by a fraternity.

AMU

You can derive the benefits of social contact and political status at Miami without joining a sorority or fraternity. There is no need to feel that you are going to be "left out" of campus dings just because you don't join a sorority or a fraternity. There is at Miami an organization of independents which is designed especially for students who for one reason or another did not become affiliated with Greek associations.

The Association of Miami Independent Students—the AMU—is a very successful organization in its own right. Freshman girls are eligible to join after the close of sorority rush week; and freshman boys after fraternity rush week.

AMU membership is very inexpensive. Each member receives a mem-

A council composed of representatives elected from each dining hall on campus, takes care of the official functions and general guidance of the AMU.
SEMI-PROFESSIONAL COURSE

Set up in the spring of 1941 to meet the demands of those students who for various reasons found the straight four-year professional or the unprofessional liberal arts courses insufficient, the (semi-professional) curriculum has increased in importance to the student in time.

In view of the urgent demands of the war industries for quick preparation, there are many of the skilled trades and for a shorter, but complete, un of instruction and training before a boy is called into active service, this two-year pre-degree program is especially designed to offer a shorter time

The new curriculum includes a standard two-year training in the following fields: business and mechanical training, and general education in the liberal arts.

Through highly practical in nature, this program provides the social and cultural values of college training. It is recognized that a considerable portion of a person's life is spent in activities unrelated to one's vocation, and that general education is essential to a completely educated life. There are no required courses except physical education and the courses are selected to meet the individual needs.

Two types of courses are offered under this broad set up four vocational areas provided: (a) secretarial, (b) salesmanship, (c) household arts, and (d) production industries.

The Semi-Professional curriculum is intended primarily for the following students:

1. Students who, for one reason or another, cannot attend college for more than two years and whose vocational and personal needs can be more adequately met by the offerings of the two-year curriculum.
2. Students who are not interested in any of the four-year professional or pre-professional training programs, leading to the bachelor's degree. New students are admitted to this curriculum only with the approval of the admission committee.
3. Students who are not so academically inclined or who find themselves unable, unwilling, or find it unwise, to pursue a strictly academic and professional course of training.
4. Students who can profit most from practical rather than theoretical and technical training.

5. Students whose academic background is such that success in a strictly academic or professional course is doubtful.

6. Students whose vocational objectives can be met best by the offering of the Two-Year Semi-Professional curriculum.

7. Students who have failed in the degree program, but who are recommended by their Academic Council of the University. This, obviously, does not mean that any student who has failed in a degree program is eligible to enroll in the Semi-Professional curriculum.

A complete description of the courses of instruction in the two-year curriculum can be found in the University catalog.

AERONAUTICS

Always a leader in the development of new fields, Miami, in the fall of 1941, inaugurated a department of aeronautics. The admission of such a course at this time is a major part of Miami's defense effort.

Courses in this department may be taken as a field of concentration in the College of Liberal Arts or used as electives for a minor in aeronautics combined with a major in the School of Business Administration. A student enrolling in this curriculum will receive ideal training for a position as an executive in the aircraft industry or aeronautical engineering, personnel work, production, or sales.

The department offers a variety of pertinent courses such as: applied mathematics, physics, meteorology, astronomy, navigation, aero-dynamics, radio theory and practice, etc.

The aeronautics curriculum has been designed essentially to enable the student to obtain technical training with the background of a diversified university education. It aims to prepare for the executive and administrative positions, as well as for the technical positions, in our fastest growing field.
Facilities and interest in this field were given great impetus when the Ohio State Assembly recently voted to appropriate $60,000 for the con-
struction of a three hundred acre air-
port adjacent to the University cam-
pus. With the completion of this proj-
ect later this summer, Miami will have one of the best equipped aeronau-
tics education phases in the country.

CPT

Government-sponsored Civilian Pilot Training under Professor E. M. Al-
baugh head of the aeronautics depart-
ment, is a very popular field with the students. At present, the speedy little Aerocraft training ships are hangered at the Middletown airport, some 25 miles from the campus. Trans-
portation is made from the airport in station wagons armed with flight in-
spection equipment, when traverses the distance several times daily.

There are now sixty students in the Civilian Pilot Training course. They accommodate their flying hours in a fleet of nine ships. With the opening of the new facilities, which will prob-
abley be completed by the fall of 1943,

there will be accommodations for up-
wards of 100 flying students. This re-
sults therefrom the possibility of govern-
ment increase which might make this num-
ber even larger.

The enlargement of the Civilian Pilot Training enrollment will natural-
ly necessitate a proportional increase in the number of phases used in train-
ing. It is estimated that a miniature armada of twenty-five training ships will be in use at the new airport dur-
ing next September.

There are no very stiff requirements for admission to the Civilian Pilot Training course. Naturally, there is a physical examination which must be passed, if the applicant is under the age of 21 he must have his parents' permission to take the course. Enrollment is open to high school seniors, juniors, and seniors, and each enrollee is required to sign a pledge stating that, in case of emer-
gency or war, he will enlist in the Army or Navy Air Corps.
At the beginning of the semester, the first five days are set aside as Freshman Week, and during this time the new students have the away of the campus. The only newcomers allowed in touch are the counselors, professors and those who are working.

The program begins with convocation Monday evening. Here the general outline of events for the week is explained and each student receives a list of what to do and when to do it. Another general meeting is held Monday morning, and the students then separate into their individual groups, identified according to their schools and major subjects. A faculty member or that department is leader of the group, aided by a student assistant, and it is from then they you can get helpful information and advice. Every Freshman takes an assortment of psychological tests, and fills out an apparently endless amount of information blanks. Placement tests are also given to determine the Freshman's knowledge in a particular field.

But the business of being familiar with the University isn't all work.
An afternoon is set aside for a tour of the campus, and the group assist and shows the newcomers the dormitories, recitation halls, laboratories and historic landmarks. Use of the library is also explained. Sometimes the tour of the week takes a physical examination in store for you, and your return condition will be checked by a later test taken at the end of your first year. An ordant comes during paydays, when you stand in line for hours. It seems, waiting to pay your expenses for the first semester.

But there is also an elaborately secret program. The YMCA and the YWCA cooperate to stage a men's and women's mixer, during which the fellows and girls get acquainted. There comes a mixed mixer in the Women's Court and chances for everybody to meet everybody else. No introductions are necessary and delightful conversations is the order of the day. If you see a cute blonde, it's quite in order to walk up and ask her to dance and to take her home. . . . Maybe she'll be the beginning of a beautiful friendship. One night movies of the movies of the fall are presented and some of the traditions explained. On still another night the ministers of Oxford's churches speak briefly, and then the assembly breaks up and the students go to their respective churches, where the young people's organizations have programs planned. Frequently in the afternoon teas are held, giving the freshmen even more chance to get acquainted. So you can see that if you are the least bit sociable, you'll have gone of friends by the end of the week.

But even a freshman week must come to an end, and it Thursday the upperclassmen return and college really sets underway. Friday morning set officially at 9:00 classes get underway, and you've been for 16% Miami student. Registration And Paydays

After you've had a chance to glance at your Freshman week schedule, you will notice that about half a day is reserved for registration and paydays. In McCaffery you will register very carefully with a member of the faculty, have your class schedules made out, and get one of the long lines of students waiting to pay fees, and then be gradually relieved at that large sum of money you'll will take a long time to be replaced. It may be a good lesson, and maybe you will be a little wiser, but there will be a person
or a sign at every corner, to tell you what to do next. So you'll usually take out from your pocket that candy bar or apple you brought along to ward off starvation, and just as you're about to put it into your mouth you see a cute little blonde or a perfectly handsome fellow ahead of you in line, and you gulp instead. Lots of college romance begins in purline.

Seriously though, perhaps you are wondering how to handle this money situation, not only for payline but also for the rest of the year. You can take your choices of systems or figure out a system of your own. One method is to deposit a lump sum, sufficient, for a semester's or a year's expenses, in one of the two Oxford banks and write checks as you need money. Or perhaps you would like to draw on a home checking account, held jointly with your parents. These two systems encourage financial responsibility, and give experience in planning ahead. A third plan, most convenient for those who have to work part time, is to keep a balance directly from home, used to defray current expenses, and a larger amount sent to meet the heavier demands of fees at the beginning of each semester. The amount you will actually pay in payline varies between one hundred and two hundred dollars. This varies depends largely upon your laboratory fees, and whether you pay a semester's board in advance or in monthly installments of about twenty dollars.

**SUMMARY OF EXPENSES**

The expenses for the year which are directly connected with the University are as follows:

- **Room**: $60.00
- **Board**: $25.00
- **Academy fees**: $20.00
- **Book and stationery**: $30.00
- **Laboratory fees**: $15.00
- **Miscellaneous**: $10.00

**Total**: $155.00

The above estimate does not include laboratory equipment or books. All figures above, except the estimated labor fees of $15.00 a year. Laboratories deposits vary from $1.00 to $25.00. Books cost from $15.00 to $25.00.
Your spending money will depend upon you and your pocketbook. It is rather hard to spend an enormous sum in Oxford. Maybe you’ll want to date a lot. Maybe you won’t want to date at all. Maybe you are planning for a boy friend to pay for all your clothes. Don’t, it’s impossible to say just how much spending money you will need. It’s pretty hard to spend as much as $3.00 a week. This is suggested as a maximum. Most students live on $2.00 a week or less. Don’t be alarmed. On the average, over half of your expenses come from work experience in such matters as a position in the University suggested to you that will enable you to live on the minimum of about $1.50 a week.

Your registration is an important part of this holiday. Don’t wait until you scurry in the last week of Mr. Godfrey to get into line to decide what you want to take. Based on the advice you will get before you set foot on the campus, If you know what school of the University you visit to enter, that will fix most of your freshman subjects. But not all, and make things much easier for you and your advice in this matter. While your course may be desirable, but it is not necessary to change your field of concentration your first year.

Read the catalogues. Maybe you don’t understand all it has to say about hours, credits, and points, but it is as valuable as any other. The material in the first third of the book will prove valuable in reaching your required courses. By "required" courses, we mean those that are necessary to graduate from a particular school.

Some prepared to go through pay-in-funds intelligently. Know approximately how much your expenses will be so it won’t come as a complete shock.

Have a tentative course arranged as that with the help of a registering officer you can easily complete your schedule. Do those things, and pay-in-funds will be no "required ordeal!"

What To Bring—Women

Nine-thirty! The stores are open, and I rush to begin my shopping, first on my list of "musts" for the college days are dresses and bed-spreads. Let’s see, my roommate voted for red and blue. Then, too, there are those white things that match the blue dress. There should be red, green, or blue. I can’t decide. Well, I must do something. Yellow! To complete my room furnishings, I need an armchair that will throw me out of bed, a dresser mirror, and possibly, a dresser lamp.
And I mustn't overlook those blue monogrammed towels I've been prom-
ising myself.

Heaven's! It's getting late. I must 
fly down to look for some smart 
sweaters and skirts. Most college 
girls live in them, and I'm sure 
Miami is no exception. Luck is with 
me. I'll never have enough tailored 
dresses for dates, runway, and Sun-
days, but I won't need any more than 
my two fashions for a while, at least. 
Now that I remember, Mother did 
not forbade me to buy a new skirt, so 
that eliminates that. Next comes 
a housecoat or bathrobe—chimpan-
—that word reminds me. I'll have 
to buy a housecoat and sandals. 
Shoes seem to be the important 
item left on my list. They're on the 
second floor, I think. There's a "down 
car" now. My "beat-up" saddle is 
still in running order so that leaves 
a new pair of panniers. Bedroom slip-
pers are essential, but noisy ones are 
outdated. . . . I suppose it does 
rain occasionally, so boots seem in-
evitable (darn!). Anyway, I can 
cheer myself up with bright red ones. 
And speaking of rain reminds me of 
that super raincoat Aunt Mary bought 
me.

Naturally, I hardly expect to spend 
all my time studying. The Univer-
sity golf course sounds more than 
inviting. I'm praying my jodhpurs 
still fit—for hitches, picnics, and rid-
ing. And according to the catalogue, 
Miami maintains scads of tennis 
courts, so I'll have to buy some new 
balls and have my racket restrung. 
Well, I guess that covers my leisure 
time equipment.

If I can see over these miscellaneous 
packages, and peek at my watch. . . . Mercy! Four-thirty, and I 
have a date. I'll have to forego 
such miscellaneous items as a shoe 
rack and napkin ring, but maybe Ox-
ford stores will have them. I'm cer-
tainly worn ragged, but with all this, 
I ought to be well prepared for a 
beautiful year at Miami.

What To Bring—Men

It is unnecessary to gather all the 
equipment, clothing, and miscellaneous 
articles that you have collected during your eighteen years of living 
and bring them along to Miami for 
two reasons. First—you probably 
won't have room for all of them. 
Second—many of them will prove to 
be needing more than dust catchers 
during the nine months of school.
Clothing is an important item in the list of necessities, but it is often over-emphasized. The requirements of a real "smooth apple" are actually a clean-shaven face, well-fitted shoes, trousers, with a clean, creaseless shirt, and a suit that doesn't look as though it's been lived in for six past weeks.

A coat, shirt, and tie must be worn to dinner in all the dormitories. It is difficult to serve an actual list of clothing to write—but a well-equipped wardrobe might consist of a good suit, a sport coat, a pair of shoes (one for campus wear and one to wear on that mower date), two odd pairs of shoes (one to wear on field trips and hikes), and the usual sweaters, shirts, ties, scarf, hat (if you wear one), and socks. If you plan to attend the "big" dances at Miami, a suit or tie should be included in the list.

A loud alarm clock is of paramount importance. More than one boy has been cut out of his right o'clock because he had the habit of rousing or its mother to wake him every morning. A bureau, desk, chair, and bed are in every room. Sheets and pillow slips are furnished, but you should bring blankets along. Certain pictures, signs, small rugs, personal cards, and a radio will add life and "stardom" to your room. Gym is a requirement, to don't fail to bring gym clothes. Miami has ample space for all kinds of sports, including golf and tennis.

Dormitory Life—Girls

"Good!" Over 100 girls rush "like ants" to their dining hall for an instant event which takes place in the most efficient manner possible. Girls aren't really hungry. But if you really are hungry, be positive about your next meal. The discussion over table can make food to those who are the inevitable subject of men.

Dormitory life is more than becoming a book and aiming to be a "VU fish". If you will arrange your study schedule in the most efficient manner possible, there will be plenty of time for books and swimming. The life in your dormitory is probably one of the places where you'll collect memories of college life to store away for future reference. Of course there are "quiet hours" from 7:15 to 9:00 in the evening and
after IC-30. But bell sessions, eiting

the text "Mom" sent, ranging to the

phone from the shower when the man

is near in your life call and various

other terms of recreation, depending

on your likes and dislikes, all figure

predominantly in a freshman girl's dor-

mibility life.

One of the day's highlights is that
time when the mailman, loaded down

with laundry—same packages, letters

and various hometown newspapers,

makes his much-awaited entrance.

Allom, ten seconds after The Miami

Student arrives on Tuesday and Friday,

the news is circulating from room to

room, especially the items in the gen-

eral column!!

Your first week at school would be

e a reading one—or is the word more

positive—if you were not guided

and advised by your sophomore conser-

vatives, girls who were freshmen last

year and were chosen to be your stu-

dent advisors because of their winning

personalities, scholastic achievement,

responsibility, and experience. Your

house chairman, a junior girl, and the

head of the hall will also be ready to

 lends a helping hand whenever you

need one.

It will all be new to you, but we

promise you you'll love it!
Dormitory Life—Boys

The dormitory life of a freshman might well be termed the principal influence of four years of college life. It is there you will acquire your study habits, choose your type of associates, and form your opinions on all phases of college.

From the moment you move into the dormitory until the moment, nine months later, that you move out, you will be adjusting and readjusting yourself to the two hundred or so fellows of your own age who will stay in the same building. Those here can make the difference. The cause of a group of this size are always some fellows who don't study, or who can get along with a minimum of study. Then there are the boys whose sole ambition is studying. Or creating ball sessions, or defiling. If you are an average "Joe," you will find it to your advantage not to confine your associations to a limited group of fellows, but to meet, and have connections with as many of them as possible.

Your roommate will undoubtedly be one of your closest friends, and it's a good idea to cultivate this friendship from the first moment you meet him.

Who knows but what he might be well acquainted with that cute blonde who sat in front of you in English composition? Of course there are better reasons than that; for instance, the fact that you will be sharing the same room, some of the same books, and probably some of the same clothes for nine months.

Your actual life in the dormitory will consist of rushing to breakfast, rushing out to classes, rushing back to the machines in eager anticipation of that check from the folks, and rushing into your room to study during those hours, which commence at 7:15.

There are dormitory rules which are necessary and easy to comply with. The first time your provost tells you to turn your radio down, it may bother you, but that same night, when he says "The Bowling Team plays at 8," it is his way of reminding you that the one thing that a college man must do is study. If you prefer an apple to oranges, you will be sure to keep his grace, and study. That provost is an appraochman who can solve all your problems. He has had a year or more of college life, and will be able to pass on to you the "wise of wisdom" he has acquired from his experience.

Dull sessions will offer you an excellent opportunity to become acquainted.
with other fellows’ opinions on every-  
thing from love to war—but remem-  
ber, they are just fellows, and should  
not carry too much weight in the for-  
mulation or adjustment of your own  
ideas.

A combination of cooperativeness  
and friendliness will prove to make  
your dormitory life one of the most  
enjoyable periods in your entire life.

RULES AND REGULATIONS

Here at Miami, restrictions are few,  
and in general, if you act as you really  
think you should, there will be no  
rules to trip you up.

There are, however, a small list of  
regulations which are peculiar to Uni-  
versity life.

In first place stands the “no car”  
rule. Students, unless they have Uni-  
versity permission, do not own or  
drive cars. You’ll soon find yourself  
not missing this at all, because every- 
one, from President Upham down,  
walks and walks and walks.

Rooms in the dorms are provided for  
those girls who wish to smoke, and  
2 is an accepted rule that they do not  
smoke in their own rooms, on the  
campus, or the streets.

Since study is the purpose of any  
University, there are rules governing  
the dormitory house life of the girls.  
There are evening study hours from  
7:15 (but after Fred Warling), until  
shower time at 10:00, and again at  
10:30 until the early lights go off at  
6:30.

The doors close very promptly at  
10:30 at nights a week, and at 11:30  
on Fridays. Late permissions may be  
secured for attendance at dances.

Curfew is strictly enforced and when  
meeting the hall in the evening or  
when leaving town at any time, per-  
mission from the head of the hall is  
required for curfews or for overnight  
absences in Oxford. Special permis-  
sion from home is necessary for abs-  
ces away from Oxford, except when  
going home. Guests in the dormi-  
tories are required to observe the  
same rules that govern the brothers.

To help you get “into the swing” of  
your classes, freshman girls may visit  
only on week-ends. But after the first  
semester, if your grades average a C  
or better (and they will), you may  
skip on week-ends.

Girls, with approved chaperonage,  
may go to fraternity houses during
open house. Hours set by the facul-
ty for the open house must be ad-
hored to strictly.
Clothes suitable for athletics or gam-
bathing are worn only in places set
aside for these activities.

Offenses such as dishonesty, drink-
ing alcoholic beverages, and gambling
are governed by a cooperative dis-
ciplinary board of faculty members
and students. Students brought be-
fore this board are liable to be sus-
pended, which results in dates and ab-
sences from the curriculum only for
classes or library work, or even to
suspension from the University.
No one will shadow you to see that
you do any of these things, but, sim-
ply enough, you'll be doing them
and liking it before the Bobby
whistle blows at the opening football
game.

YOUR HEALTH

One of the most important consider-
ations while at Miami is your health.
For unless you are physically fit you
cannot put forth your best scholastic
endeavor. Balanced meals are served
in the dormitories. These three meals
a day prove a very important condi-
tion in your health program. The
atmosphere around Miami is also quite
climatic to good health. Leisure walks,
rides, and bicycle rides are forms of
amusement which will keep you fea-
turing "tops" all year round.

If you have injuries as a result from
too much running during Physical
Work, or if a bone strain, the flu, or
the sniffles get you down, don't suffer
silence or try to "hang it out" by your-
self. Go to the University hospital,
located just south of the Power Plant.

Emergencies are cared for at any
time. The clinic is open daily from
3 p. m. to 15 noon and from 2 p. m.
to 5 p. m., and on Sunday from 3 p. m.
to 11 a. m. You are always expected
to report to the clinic when you are
too ill to attend class, as class absen-
tee will not be excused unless you are
concluded in the hospital under doctor's
orders.
The student health fee is the hospital's means of support. It entitles you to three free visits of hospitalization a year and to clinic treatment throughout your college career. The hospital has adequate equipment and facilities to take care of you when you are ill. It has an able staff of three doctors and six nurses to help you. For your health, "Mom" Myers, the head nurse at the hospital, is familiar with all Morrisians who have visited the hospital.

A word of warnings—don't forget to sign out at the dorm when you leave for the hospital or have your roommate do it for you if you are too sick to do it yourself. Failing in your suite's some etiquette and ink, a pen, or your knitting, because this hangs heavy while you sleep. A little rest and sleep any more. Notes from the nurses help pass the time away more quickly. The nurses are on post in the morning and will deliver any notes left at the front desk.

When you are ill, seek your bug and head for the hospital. That's the best place for you, for they'll fix you up in no time.

LOOKING FOR A JOB?

Jobs are not difficult to secure if you know whom to apply to, whom to see, and approximately what you wish to do. Oxford is a small town, but practically any student in need of financial assistance can find some way to earn money in the town or on the campus. The campus looks up to any person who can earn his way through college and at the same time keep up his grades, but don't let that make you feel that you have to starve to save your grades and to save your grades and to save your grades. Jobs for freshmen are scarce, but second terms are somewhat liberal and therefore freshmen should certainly be prepared to finance their first year if at all possible.

Dining Halls—Students may register for work in the University dining halls at the office of Mr. P. C. Allen in Build Hall. This manner a student may earn his meals by working in the kitchen.

University Jobs—The University stresses student work in cooperation with residence halls. For girls this means work as waitresses and hall girls, and for boys, jobs as postmessengers, waiters, and at the Food Service building. The University also
offers employment as laboratory as-
istant, Mr. E. C. Allen, in Benton
Hall, is in charge of University jobs.
The student should apply early in the
summer. The time of application and
the individual's need will be con-
sidered.

Student Employment Service—Mr.
Robert Goodman, executive secretary
of the Y.M.C.A., and Miss Emma Re-
phone, executive secretary of the
Y.W.C.A., are in charge of a student
placement bureau that yearly helps
many students find jobs. Mr. Good-
amon's office is in Osborn Hall, Miss Re-
phone's in Hopburn.

Miscellaneous—Numerous jobs are
obtained by students in various estab-
lishments in town. The clothing
stores, drug stores, and sandwich
shops, offer an excellent place for
those interested in finding employ-
ment.

To date there has been no definite
information concerning NYA jobs for
next year. However, the University
is accepting applications and if it is
at all possible students will be placed
in NYA positions. Applications should
be sent to Mr. C. T. Jenkins in Ben-
ton Hall.
WOMEN’S SPORTS

No doubt your first acquaintance with the physical education department will be quite informal, especially in regard to the sports you enjoy, you’ve guessed it—that physical examination which is given during the first week. After you enter Horcon Hall (headquarters for all extramural physical education activities) someone will aise you a green or blue tank suit at your desk. This, you certainly will be the exception.

After standing in line anywhere from fifteen minutes to an hour, you’ll begin to realize the importance of doctors, nurses, and physical education teachers who will probably tell you more about yourself than you’ve known before.

Meet The Department

Before you leave Horcon Hall on that fateful day you will probably know all the members of the department. Mrs. Margaret Phillips, head of the department, can usually be found in the conference room, where you will discuss your physical education program for the two years of required work. Miss Margaret Shaw will also be there to help you select the activities from which you will get the most enjoyment and benefit.

How strong are you? What is your pitching capacity? Miss J. M. Jenssen and Miss Martha Bryan will let you know after you’ve performed for them. And then your posture! Miss Dorothy White will pass judgment upon your spine and give you tips on how to straighten and fall.

What Can You Take?

Even if you are very particular about what sports you like, Miami’s program offers you a large choice of activities. The requirements call for two individual, one rhythmic, and one team activity during your two years’ work. The program is divided according to seasons, fall, winter, and spring, and you may choose which ever you wish from a list including hockey, lacrosse, soccer, archery, tennis, golf, camping and outing, horseback riding, and volleyball in the fall; badminton, bowling, gymnastics, dancing, folk dancing, modern dancing, social dancing, and tap dancing in the winter; and baseball, riding, tennis, golf, and archery in the spring.

WRR

The Women's Recreational Association is an outstanding organization on the campus. To the older members it is sometimes thought of as WAA. Wo-
is composed of representatives from the sophomore, junior and senior classes and the faculty of the women's physical education department. Each seasonal sport is directed by a student manager who sets up tournaments and the special activities for the sport. The managers are non-voting members of the WRA board.

The Cabin

Soon after you become acquainted with WRA members, they'll be telling you out to the cabin, which is their special pride and joy. Located five miles outside of Oxford, this lovely rustic building is equipped with beds, kitchen facilities, a fireplace, couches, and easy chairs. It was purchased by the girls themselves with money from the sale of food at football games. It is used for overnight parties, cook-outs, tafta pull, hall-to-hall parties and other special events.

Let's Create

If you happen to be the kind of a roommate who chatters up a room with all sort of carving, or any other form of "stuff" which you call a hobby, the place for the expression of your feelings is in the hobby room, in the basement of Herron Hall. In this room you
can find an outlet for your artistic abilities in leather work, metal work, wood carving and other crafts.

Information Please
The latest undertaking of the WRA is the new publication, "School and Home." This is published monthly to inform WRA members of coming social events, special projects, work of the board, and humorous happenings at the field house or gym.

Spare-Time Sports
During your spare time you will probably want to participate in some sport. In the fall teams are formed in hockey, lacrosse, archery, and volleyball, with competition between classes. Last year the hockey team played Ohio State, Western, and U. C.

Winter sports are many, basketball takes the lead with a tournament between seniority and independent- ers, followed by a class team competition. Tournaments are also held in ping pong, badminton, and bowling. Peacocks are scheduled for this time. Climaxing the season is the varsity party, at which honors are bestowed to those deserving.

Comes spring and days on the ten-

nis court, golf course, baseball field, and archery range. Tournaments are held in each of these, and if you have special ability or just like to have fun, this is your time to shine.

Camping and outing activities, plus hiking and bicycling, are held all year round. The same is true with co-recru- tional sports on Saturday afternoons, when you will be permitted to bring your gentleman friend in for a game of badminton or ping pong.

Are You Standing Straight?
One of the high spots of the year's program is the annual posture contest held for all women on the campus. Among the prizes are selected for the final and put on quite a style show for spectators. A winner receives a year's subscription to "Vogue" magazine.
MEN'S SPORTS

Sportsmanship Creed

Honor and sportsmanship go hand in hand. Honor is to be beyond reproach and sportsmanship playing hard, and above all, fairly. Sportsmanship has helped build great teams and future great leaders. It is to win and shall put forth your all to win. We shall not yield to the odds an Applicant Ten nor that you shall accept defeat with smiles and the determination to try harder next time. It says that you shall accept the umpire's decision whatever it may be and not call your opponents names or throw stones at them; that you shall treat the visiting team as your personal guests and give them every advantage of position, if there is such an advantage.

Miami stands for sportsmanship in all its athletic endeavors. Miami coaches teach the teams to win by fair and hard play. Miami and we here at Miami who engage in athletic events can be said to be worthy of respect when moral habits and character traits and honor are taken into consideration. Good sportsmanship is, and must continue to be, the code of Miami's athletic policy.

The sportsmanship of the teams and
the spectators are more impressed upon the find of the opponents that is the score of the game, no matter how important that particular game may be. There should be a rivalry between the teams, and opposition in the stands that expresses its way in the stands in a way that makes the outcome of the game may be.

Will you help us, the coaches, as the whole University in general, in earning the title of a model school for sportsmanship? May we enlist you to spread Miami’s honorable name far and wide by helping us to maintain and even improve our standard of sportsmanship which is a source of pride among our men and women?

GEORGE L. RIDER,
Director of Physical Education.

Miami Athletics Policy

When the old Buckeyes conference broke up, all Miami athletics co-ops became independent of any league. For the past three years we have been engaged in competition with only schools as the University of Chicago, Ohio University, Ohio Wesleyan and the University of Dayton, which are all traditional rivals and members of the disbanded Buckeyes Conference. Miami is a member of the Ohio College Association, and so we will uphold the association’s six principles:

1. We indulge in intercollegiate athletics because we believe we can have educational value, and because students enjoy competition with other colleges. This purpose dominates over all publicity and financial gain.
2. We do not favor the policy of placing for championships except in sports where all colleges concerned compete in one meet.
3. We realize that all competitive sports are really as administrative responsibility of the president to know what is going on in the athletics of the school, and we intend to oppose all attempts to control athletics by outside agencies not scholastic in nature.
4. Colleges should compete in athletics with other schools of similar size and type located within reasonable distance.
5. Students who participate in athletics shall not be favored above other students in such matters as scholarships, loans, grants of financial aid, and remunerative employment; the administration of such matters will be independent of the athletic department.

important questions regarding our ath-
etic policies.

Miami Mentors
George L. Eiler, Director of
physical education, also coaches
track and cross country. Both
his track and cross country teams
have been outstanding, rarely losing
even one meet in the course of a
season.

Herbert A.8., Otterbein '16, di-
rector of intercollegiate athletics, was
formerly freshman coach of track,
football, and basketball. Now he ably
handles the Intercollegiate side of
Miami athletic activities.

Stuart Holcomb, Ohio State '23, is
Miami's new head football coach. For-
merly a star on Ohio State's football
team, Holcomb has compiled a coach-
ing record of 13 games won, 21 lost,
and 8 tied in ten years of coaching at
Washington and Jefferson, Musking-
ham, and Findlay.

Walker "Hibb" Van Winkle, Ken-
tucky Wesleyan '24, has compiled a
fine record in 3 1/2 three years of pilot-
ing the varsity basketball squad. Af-
ter basketball close in the spring he

takes over from baseball. In the fall
he has helped scout rival football
styles.

Harry Roe, Iowa '27, who compiled
an outstanding record while coach at
Adams High School, is now
coaching the fresh football, basketball,
and track teams. He is trying to
whip out the varsity gridiron by scouting
future opponents in the fall.

Audrey Gillman, Ohio State '24, is
coach Holcomb's assistant on the
football coaching staff. He will be
handling the linemen this fall.

R. J. "Jay" Calville, Miami '26, han-
dles the medicine kit for the Big Red
team, and instructs the boxing can-
didates.

Intramurals

The well-organized system of intra-
murals which Miami now boasts be-
gins in 1918, with a system of inter-
club and inter-fraternity athletics.
The genuine enthusiasm which was
shown by the founders and which was
maintained by controlling classes gave
the movement impetus.

Intramural sports fall into three
seasonal periods. The first, fall, in-
cludes such sports as softball, golf,
and tennis. During the next period,

winter, come such sports as basketball, weight lifting, handball, and fencing. Spring, the last period, introduces swimming, softball, golf, and tennis.

For freshmen there is an excellent opportunity for inter-dorm competition, due to the recent increase in the number of dorms. Miami, in recognizing this opportunity, offers a competitive program in baseball, basketball, tennis, and track. To the winning team in each sport, and to each individual member of the team—now a framed certificate from the athletic department. At the end of the season, an esp is awarded the dormitory having the best yearly record. This record is based on the number of championships won.

Although intramurals are not a required activity, every freshman is encouraged to participate in some field. We suggest two advantages in an intramural system: The contacts made prove valuable, and the physical development of each participant will be enhanced. The intramural system proved popular enough to attract approximately 65% of Miami's men. They found it an excellent method of filling leisure time.

How to Go Out for a Freshman Team
1. Watch The Student, which is the campus newspaper, for announcements concerning practices.
2. Go to the coach of your particular sport. Get acquainted with him. Let him know that you are interested, and get information about practices.

Letter Requirements
Football—One-half the total number of quarters. Being in games one play counts as one quarter.
Basketball—One-half the total number of halves in a season. Three minutes is a half count as a half. College games only.
Track—one-half the total number of innings; one-fourth the total number of innings for pitchers, and one-third for catchers.
Track—average three points for each meet and a point to date meet. Cross Country—Individual or team winning two firsts in a dual meet. Senior Award—Letter and sweater to man making, requirements in two or three years.

Tribe Miami
Clean athletics and good feeling between Miami teams and teams from other schools symbolizes this campus

IN III HARRISON HALL

Christian Science, Activity in sports is their main goal and wearing an "M" means well-earned recognition. Regular dinner meetings are held at the various fraternity houses where fraternities or discussing the latest tournament of Miami's athletic program.

Cross Country
As in track the Redskin cross country teams are known throughout the nation. Against teams such as Ohio State, Ohio University, Buick, and Western Ohio the varsity runners hold a much better than 3:00 average. Freshmen have an opportunity to win as a team by ranking among the first six men in the average results of the four-time trials. The fresh run. Freshmen cross country practice starts the latter part of Freshman Week and continues until the last of November, under the direction of Coach George L. Elder, who also coaches the varsity cross country squad and the track team.

After limbering-up drills the cross countrymen jog the two mile Western Ohio field while in top condition, they move onto the varsity five-mile course for the remainder of the season. When cross countrymen become
sophomores with C average grades they can try out for the varsity team which last season was unbeaten in dual competition and placed seventh in the National with Aiston finishing fourth among the individual runners.

1942 Football Schedule
Sept. 25—Open.
Oct. 3—At Dartmouth.
Oct. 10—Kent State.
Oct. 17—Dayton.
Oct. 24—At Bowling Green.
Nov. 1—Ohio University.
Nov. 8—At Western Reserve.
Nov. 14—At Western Reserve.
Nov. 21—At Cincinnati.

Football at Miami has been in the doldrums for the past three years. Material has been fair, opposition tough. Results, worst for the Big Ten have been plentiful. And for a school with the football tradition which old Miami possesses—when Buckeyes championships and before that Ohio conference championships were common occurrence—there is no getting around the fact that football has been a sore spot. This team just wasn't winning.

But at the close of the 1942 season,
football underwent a drastic reorganization. A season which began with Dartmouth rolls through the toughest opposition Ohio can offer and winds up with the traditional Thanksgiving Day Cincinnati battle, left no doubt on the question of whether something had to be done.

Stuart Holcomb, former Ohio State backfield man and Washington and Jefferson coach, took over the coaching reins of the Redsticks from Fran Wilton, two years a Miami coach, and brought with him Sidney Gillman, once an American end at Ohio, to be his assistant. A new regime in football moved in.

With little fan and much determination these two appeared on the campus in time for spring football and pitched into the job of rebuilding the teams and spirit which have always been Miami football.

This year's squad will be completely revamped. Graduation took only three Redsticks, but the Army Force and defense jobs will prove an as yet uncertain roll of the remaining returnees. With the best of a good freshman team fighting to fill gaps in the line-up and the returning varsitymen, who rated promising but inexperienced last year, things should definitely
Good for One Toasted Roll

at

Venn's

"Where it's fun to be hungry"

Not Good After Oct. 15, 1942

book up for football at Miami. No one expects miracles of Holcomb or Gillman, but keep your eyes open for

prizes. The rivalry between Ohio State and University of Miami always has

been intense, but Miami always has

some weary men who play their first

football after coming to college. Any

one who reports to Coach Rice gets a

fair chance to show just what he

can do. If the squad is too large, 60

too many freshmen decide to give foot-

ball a try, Coach Rice will his squad

in fifty or sixty—but not before the

days when two or three weeks driving which

everyone has an equal opportunity.

Last year's freshmen inaugurated a

new era in University of Miami foot-

ball by playing Cincinnati's freshmen

in a thrilling game. More games

are planned for this year, thus adding

a little more fun to the old routine of

fundamentals and scrimmage with the

varsity. The freshmen squad looked

forward to the Cincy game all last sea-

son and demonstrated their eagerness

by asking for a return trip.

Next year's schedule is a typical
Miami schedule—with no breaking spells and repetition of grade "A" number. Dartmouth, Dayton, Ohio U., Waverly, Hamline, Ohio Wesleyan, and Cincinnati give a rough idea of next year's foe.

Basketball
Completing his third season at Mi-
ami, Coach "Red" Van Winkle, can
look back upon the 1942-43 season with
more than a little optimism for the
future, as Miami's nine losses and six
wins were not exactly significant of
the team's true strength. Many of
the games were lost by the margin of
a few points and, in numerous in-
stances, including the final battle with
the University of Cincinnati Bearcats,
Miami was rated the superior team
even in defeat.

The prospect for the future seems
ever brighter upon looking back over
the schedule as Miami's revengeful Epolhkas showed consistent improve-
ment as the season progressed. After
winning only two out of the first eight games, the Miamians hit their stride,
and, went on to win four of the next
seven games, while losing the other
two only by a narrow margin of a
few points.

Opening the 1943-44 season the Van
Winklemen will be hard hit by graduations, having lost lettermen Cogdell, Bob McInade, Jim Uram, Roy Yuma and Bay Palma. It was this four-some, together with either Stump, Dillon or Jones, that comprised the Indians’ first string. The three leading scorers were Palma, McInade, and Uram. These three scorers garnered a total of 203 points among themselves out of the 244 marks that the Indians tallied.

Providing the arm does not take too many cagers, Miami’s 1944-45 season should be more than mediums, with the return of such stalwarts as Jones, Alderson, Stump, Palma, Dillon, Talmie, and Cogdell. Last season’s first team, Clary and Vobich, were declared last year’s hit list. Of these cagers booths eligible, they should add considerably to the Indians’ defense punch. Other than the seniors and seniors on the varsity will probably be Fowler, Pierson, Weber, Wilke, and Glauser, while last season’s juniors, assuming that they are eligible, should furnish the rest of the vital cagers in Van Winkle’s excellent basketball machine.

Track

Miami is definitely a track school. To prove this we need only to look

George Rider who has coached such
Gymnastic stars as Joe Gordon, dis
put, Jim Brown, the 440 yard
champion, and American record holde
ers such as Larry bell, the shot
thrower, and Chuck Beggart, the ten
pole champ, and Tom Harvey, Na
tional A. A. U. champion in the 220
yard dash.

Most of the team will be back for
the 1965 season as last years first
was made up largely of underclass
men. Bob Blaylock, who holds the
Miami record in the half mile will re
turn as one of the distance runners.
Vince Alston, a junior this year, will be
bent into the sprinters in the distance
events.
Allers holds the Miami over mile cross
country record as well. In the 30 Mile
Cross Country Meet at Oxford, Allers
finished just behind Bill Douglas who
went on to best out Leslie Morril
in Madison State Games last winter.
Amateur record holder on track when
the spikes are to be given over will be
John Saunderson, who holds the 33
yard high hurdles record of 11.1, and
who dominates the other dash and
hurdle events. Sometimes competing
several times together it is as much as
tour fans in one day to the Buckeye
Conference Meet at Columbus two sessions aod. Saunderson
won three firsts—two in the hurdle events and one in the broad jump. He was also picked on the first All-Amer-
can track team. Several other members of the team also were selected, most notably A. A. U. Meet at Stanford by
place second, just behind Bob Wright of Ohio State.

Other likely candidates for next
year's team will probably include
Wayne Ahrens in the pole vault, Gail
Schaefer in the high jump, Bob Hun-
ter in the 220 and 440 dashes, Bob
Harries in the broad jump, javelin,
and discus, George Rodeheaver and Fred
Nance in the weight events, Harvey
Rasmussen in the high jump and hor-
clies, and Evan Hager and Shutey
in the one half mile. Nick Rasmussen
in the shot put, and Dock, Smith, and
Puhan in the dash. Those five in-
dividuals together with Alison and
Rhineier should form a fine nucleus
for Coach Raker to build his 1943 team
around.

Baseball

Casting aside the traditional pre-
season indoor practice, Miami's base-
ball team held its initial workout on
March 16. Faced with the prospect
of building and conditioning a ball
club for the first game on April 11,
Coach Frank Wilson worked his
charges hard and long.
The return of ten veterans, Benetti, Moss, Hanton, Roor, Apolisch, Onewit, Thoms, Brutko, Mihal, and Howard, left only one position—right field—to be filled. Conversion of auxiliary in-
fielder Kramer into an outfielder was expected to fill the vacancy.

The Tribe had the first requirement of any strong baseball club—they were "strong down the middle." With star
captain Benetti catching, Hanton and Moss pitching, Onewit and Thoms at the keystone sack, and Pete Howard patrolling centerfield the Redbirds looked strong; undoubtedly with only one hitting department of unknown
strength.

Supported by catchers Steamhardt and Jossely, infielders Olson and Eichorn, and Gratty in the outfield, Miami opened the season against Find-
lay College.

Tennis
Redbird tennis teams have been out-
sanding for a number of years. Last year under a new coach they improv-
ed considerably over the previous sea-
son. Coach Burns with his new policy of morning practice and con-
d McGregor worked wonders in molding his team together.

The team was centered around all-

campus champion Harry Flum, Keith
Wilmot, and Ratko Oster. These
boys displayed excellent form through-
out the season.

In the fall, an all-campus tourn-
ament is staged in which freshmen are
eligible. Through the tournament
Coach Brewis is able to retain early
all-stars of the freshmen.

Tennis practice begins in the fall
and continues all winter indoors.
When spring comes the players take
to the outdoor courts and await the
matches which begin early in April.

Golf

Only Jim Uram remained from the
1941 golf team for the 1942 quartet
but the Redmen were confident that
a strong group of freshman golfers would
appear from the powerful team the
freshmen produced. In the Missouri
Valley Tournament the Miami men were
led by Coach J. S. Van Voorhis' intramural squad. The
other two spots were allotted to
be filled by the first three men in a 36
hole tournament.

Fencing

"Rippl's" fencing organization, was
organized three years ago to stimulate
the growth of fencing by securing
matches with other teams in the state.

Each year this group selects promising men from the incoming class to continue and develop their skills in competitive fencing.

Freshmen have their own classes and are coached by a member of the hop- foil. This sport becomes active during the winter months at Miami and continues until spring.

No experience is needed for freshmen to try out. Instruction is given with the saber, foil, and epee to those who wish to become more proficient in these arts.

Wrestling

Wrestling this year is expected to rise out of its slump when Sidney Gillman, former All-American football star of Ohio State, takes over this sport. No experience is needed to try out, as are most boys who have wrestled in the past have never had any previous experience. Freshmen may compete alongside upperclassmen in this sport because there is only one team.

Skiing

With two champions emerging from the Jaylon Golden Glove tournament, having attained a new high at Miami. The team coached by Jay Gilmore he-

gun training early in December and worked until February at which time the squad was sent to the Dayton tournament.

The biggest out-campus boxing tournament ever held at Miami took place last March. This tournament, however, was held only for novices and drew a big sensation. It will probably come an annual classic, as much hidden talent was uncovered.

Major Sports Awards

1. The varsity award is a V-neck sweater with a chiffon letter.
2. A second varsity award—a coat sweater with a letter.
3. Third varsity award, three years in the same sport, a letter blanket.

Minor Sports Awards

1. First award—a light V-neck sweater with a small chiffon letter.
2. Second award—a coat sweater with a letter.
3. Letter winners for three years in the same sport, a letter blanket.

Freshmen are awarded a V-neck jersey with initials or abbreviated surnames only. The surnames are awarded only after the winner has made grade requirements during the first semester for eligibility.
SONGS

Old Miami
Words by President A. H. Upham
Music by R. H. Banko
(Alma Mater)

Old Miami, from thy hills crest
Thou hast watched the decades roll
White thy sons have quested from thee
Sturdily hearted, pure of soul.

Old Miami! New Miami!
Days of old and days to be
Weave the story of thy glory—
Our Miami, here's to thee!

They shall ever stand a beacon
Crimson towers against the sky;
Men shall ever seek thy guiding
Power like theirs shall never die.
