The Miami University
YMCA-YWCA
Not so many years ago the process of welcoming students to college was a very simple thing. Our fall of prospects was completed toward the end of summer, rooms were assigned, and we all waited for the hundreds of automobiles with good tires and unscratched gas tanks to roll into Oxford on opening day. What I tried to say in earlier 'nt' looks could have been rephrased after year and no one would have known the difference.

Now it is all changed. Several hundred new arrivals, most of them in uniform, come to the campus every month. Freshmen classes enter upon their work in February, in June, and in July, as well as on the traditional date in September. More high men of freshman rank are due in November. Courses cover sixty, eighty, twelve weeks, or vary in terms of "credits" as well as seasons.

It is a harder problem than ever to get to know our students or to get them to know each other. It is harder to instill in them the ideals and traditions of Miami University, and to have them think of themselves as an essential part of this distinguished institution with nearly a century and a half of history. Comprehending five years. We are all of us here to help your faculty, administration, and students already in residence. Campus life will not be the same, but it promises to be fuller, richer, more worth while.

We welcome you most heartily to share in this greatly accelerated Miami Life of the war years. We are sure you will be the better for it, and your contribution to America in need will be all the more valuable.

Sincerely yours,

A. H. OPPHAM, President
FOREWORD

You, as freshmen, are entering Miami University in one of the most unusual periods of its history. We as upperclassmen are hoping to write or "M" Book or "Miami" Book which will be in the "since unforetold times, what the conditions will be next year--or are known, but in this little book we have tried to give you a picture of the university as we expect it to be. In some cases we may be wrong, for which we will apologize while saying we did our best.

In the cases of departments and men's organizations we don't even know if they will be in existence. We sincerely hope that they will be, and have described them as we have known them and hope to know them forever.

The Main of the Navy men and the WAVES will make a great difference that we can only anticipate since they are not all here at this writing. You as freshmen will see the change the same that the upperclassmen will.

In spite of all this it is an interesting time to be at Miami. You never know what will happen next, when girls will be moved into boys' dormitories and the boys moved elsewhere, how long the boys will be here, when reserves will be called and 40's re-enlisted, and what branch of the service will move into Oxford the next day. There is a limitless source of conversation and speculation over all this, and again no one knows for sure.

It is also a stimulating time to be at Miami. Just being in Oxford and going to classes you realize that in some way you must be preparing yourself to help with this war and more importantly still to help with the world that is going to result from this war.

It is an inspiring time to be at Miami. When you know how few people comparatively are having the chance for higher education, you realize the responsibility that will rest on your shoulders when you graduate.

We remember long ago the summer before we were freshmen when we got our copies of the "M" Book and how it excited us and helped us during those last few weeks of school. We only hope that in the same way this book will help you of the class of 1947.

HISTORY OF MIAMI

In 1788 John Cleves Symmes purchased from the government a million acres bounded by the Great Miami, Little Miami, and Ohio rivers. In the contract one full township was to be set aside "for the endowment of an academy and other seminaries of learning." This clause was "forgotten" by Symmes until too late; so in 1809 the Legislature authorized "Miami University" in the village and township of "Oxford," setting aside this township for its support. By 1813 Miami boasted two brick schoolhouses; in 1820 the central part of "Old Main" was completed, although Miami remained an academy. In 1824 she became a full-fledged college, graduating her first class in 1826.

One of Miami's early professors was William Holmes McGuffey. He was later in Oxford that he did his re- search and wrote much of the material for his readers.
ANYONE ECLECTIC RENOVALE. MIAMI HAVES CONTRIBUTED MANY DISTINGUISHED MEN TO OUR COUNTRY AMONG WHOM WERE PRESIDENT CALVIN COOLIDGE AND HIS RENOWNED WHITE- LOSE BURL. ANOTHER, ROBERT SCHMIDT, WAS AMBASSADOR TO ENGLAND.

MIAMI IS KNOWN AS THE "MOTHER OF FRATERNITIES" SINCE FOUR NATIONAL FRATERNITIES WERE NAMED LEAGUE (BETA THETA PI, 1897); PHI DELTA TAU (1899); SIGMA CHI (1916); AND PHI KAPPA Tau (1925).

THE TRAGEDY OF THE CIVIL WAR WAS MADE PLEASING IN THIS CAMPUS AS EARLY AS THE AMERICAN-TANCREDO IN 1867. EXPANSION WAS SLOW, BUT THE圖片 WENT STEADILY. EXPANSION WAS RAPID IN 1904. THE FACULTY MODELED 25 WITH 276 STUDENTS ATTENDING. IN 1920 THERE WERE 1500 STUDENTS, IN 1930, 2000 STUDENTS, AND IN 1940, OVER 3000. THROUGHOUT OUR HISTORY, MIAMI HAS DEVELOPED SOME OF THE MOST BEAUTIFUL CAMPUS OF THE COUNTRY.

MIAMI UNIVERSITY

ANYTHING OLD IS USUALLY SURROUNDED BY A HOLE OF TRADITION-STORED AIR, VAPOR, OR AIR, WELL GILT HER EPOXY-MARK, HAS NO DEATH IN THESE FAD NOSTALGIA. SHE HAS AN ABUNDANCE OF BOTH TRADITIONAL OPENS AND TRADITIONAL ACTIVITIES. SHE IS THE PLACE THAT MAKES COLLEGE FEEL AND THE ACTIVITIES THAT MAKE IT DIFFERENT FROM OTHER COLLAGES.

AS YOU FIRST APPROACH THE CAMPUS, A NUMBER OF CINDER PATHS COME INTO VIEW. THESE WOODLAND LINES, BRIGHT BY DAY AND GENERALLY GIRL OF HIGHER HUMANITIES IS ONE SUPERLATIVE OF NIGHT AND THICKLY POPU- LATED BY OAK LEAVES. THIS IS LOWER CAMPUS, AND "LOWER'S LAND" PROBABLY MIAMI'S MOST TRADITIONAL AND BEST-Loved TRADITIONAL CAMPUS SPOT.

Standing figure of tradition—Theb, Architect by pro-

noun, donor and builder of the Fountain, he is the

town's strongest rafter and most optimistic prophet.
Theb's dances always favor Miami, and his unfeeling
good humor is always an antithesis when luck is bad.
Witch for a red umbrella, and a white suit—that is
Theb, rain or shine.

After a Miami victory, the Yeshawks have the honor
of ringing the Victory Bell in Morrison Hall. This is
the only time the hepers replica at its tone, for the
same ringing marks the beginning of classes. Your class may
use hera if you can toll longer than the proceeding
classes.

Across the road from the stadium is Cook Field,
another traditional spot. Here, on the right before the
homecoming games, is another Miami tradition, newcomers gather tens of wood-lair or played, but not
states. Get that wood if you must sweat blood to do it.
After dark, honesiets, from, students, cheerleaders,
and band gather for the most enthralling rally of the
year. Wipe to the class whose bonfire does not last as
long as the last spark of cheer lingers in the crowd.

Back to another romantic tradition. Stretching from
Irwin Mall to the Campus Gates at High Street, H
Silver Walk, undoubtedly the most frequented stretch
of sidewalk on the campus, Silver Walk leads the varied
life. Blotting, students rush its entire length in "swell-
ing flot." Excerpts are different. These, students
would brave just walking from one gate to the other.
It is not the walking that makes the tradition; it is
the numerous clips.

May brings one of the most beautiful of Miami
traditions—May Day. Then is that outstanding girl of

MIAMI UNIVERSITY

the freshmen and junior classes are topped for the
women's bandana. Cook, may Miami Board, new
house chairman and everything are given recognition,
and each women's dormitory examines the group with
song or silent.

Those, and others, are the traditions that keep the
"Old Grids" coming back and the freshman classes
grow larger and larger.
WAR ACTIVITY

Miami University has seen many wars. To serve in
this one, the university has been designated as a Navy
training school. Of the division stationed here on
campus we have, at present, a Naval Radio Training
School, for the regular courses and also the WAVES,
in war time version of the CPT, the CAAMITS, and V-12
trainees.

The Radio trainees and the WAVES are under the
supervision of the regular Navy personnel and are such
as are subject to Navy rules. The Navy has been, and the
WAVES will be invited to participate in many university
activities.

The V-12 students and the CAAMITS are considered
as part of the student body at Miami and are permitted
by the Navy to take part in student activities if they
have the time. They will be an important addition to the
school and will be made as good citizens as possible.

But it is up to Miami students who are not here
as part of the service to see that Miami welcomes those
who are.

WAVES

At present the women student are to occupy
East and West halls, a maximum of 400 having been
allowed, 350 WAVES and 40 WAVE.

There will be on duty staff of four, eight being
WAVE officers, and one a SPAR. They are a part of
the Naval Radio Training School and follow a schedule
similar to that of the officers, which includes three half
hours, one typing class, one typist duty, and one class
in procedure each day. They enter the training course
with the WAVEs. Ratings, in general, are given in the
quality of their work are given at the end of the period,
which is a 12 weeks long.

The maximum age limit for these WAVES is the
study of radio work is twenty-six.

They are permitted to enter in many of the week-
end activities of the university, as well as enjoying the
facilities of the local USO center.

THE MAYAL RADIO (TRAINING SCHOOLS)

In 1943 the Naval Radio Training School was
a housing body of 884, Fisher Hall, Mennon Preparatory,
and The Farmers used as quarters, with administration
offices in the bat. The colleges, study halls, library
and gymnasium.

V-12

The V-12's, not yet on campus, will consist of a
minimum of 500 area. About eighty per cent of these
will be V-1's or V-2's who are now in college here or
elsewhere and are being sent here to continue their
own courses for a certain number of terms. In addition to
the work they have already completed. They do not
have to follow the V-12 curriculum but may continue
their present fields of study, except that they must
take the courses originally designated as the minimum
in preparation for general service (mathematics and
physical). The remaining twenty per cent are highschool
students who are in a specialized curriculum and have to
take specialized courses.
Except for cadets in their first semester, who are permitted to remain in their cadet status until graduation, most of them will not stay long enough to graduate.

Students who are able to carry elective credit in addition to the Navy curriculum may do so up to 140 on the extra work does not interfere with their proper performance of assigned duties. They may also substitute elective courses if they have covered adequately any of the required courses.

These men in schools designated as Navy schools have been allowed to remain where they may, but have been, put on pay and in uniform. Corresponding men in schools where they gave Navy training have been assigned to Navy schools. These men are classified as being on active duty.

The V-12s are about the same as the regular college students. A Navy Commandant is stationed here, but the college manages the cadets and the selection of instructors. All, as far as possible, their discipline. The amount of control of discipline exerted by the Commandant may vary in different institutions,

In most cases discipline will be referred to him only as a last resort.

Navy V-12 students are permitted to take part in all Navy athletic and other campus activities, as are the CAAWTS, but these are not interfered with their prescribed duties, which include compulsory physical drills, swimming, and morning exercises, besides their studies. Military training also will be kept to a minimum and supplemented in academic training.

They are also permitted to join fraternities or other organizations on the same terms on the regular students and at their own personal expense.

15

CAAWTS

The CAAWTS are on campus for four months and, at present, they take as an elementary and a secondary flight training. The Elementary is equivalent to a civilian pilot training, and includes approximately 45 hours of flight and 240 hours of ground school training. The Secondary consists of 240 hours of advanced training in navigational aids, and mechanics, and 45 hours of flight. The indoor and Mediterranean airports have been used for the training the last few years, but Navy's new field will take their place. Eight Aerostats of 45 M.P.H. are used in the elementary training, a Waco biplane of 220 M.P.H. in the secondary.

Prof. K. J. McGonigal, associated with the CAAWTS, has issued the following statement concerning the CAAWTS and their purpose.

"The CAAWTS Training Service of the Civil Aeronautics Administration is the present development of the Civilian Pilot Training program of the CAA established here in 1940. The main aim was, at the largest in this district, capture of aviation cadets utilized in the Naval Air Corps. Beginning with a quota of 13 in 1940, the program has been gradually enlarged until now there are 120 cadets taking the training. The unit is housed in being built and a new training building will be available for this purpose, May 1944. A new 350-aircraft airfield complex on aviation training plant unoccupied in the country. Cadets are former V-15 Navy Reserves.

With other Navy personnel on the campus, cadets are classified as regular members of the student body and are permitted to take part in student activities."

Here I am, at last, actually packing for college, opales is possible? Well, where shall I start? Cloths! I guess that's the logical place to begin. I'll put my sweaters in the drawer. This year I'll really get wear out of them. Cotton wash frocks are worn in the fall and spring. Skirts are always hard to pack, I want to take all of them. We have practically a uniform of grey flannel and slacks. This suit is really nice. Of course, I don't really need it, but it is so nice to wear for informal affairs when I don't want to be over-dressed. My wool dresses, cash and tailored, will be in the trunk for Sundays and holidays. Now what will I put with this extra jacket? It's the joy of my life, so long and big. I think I'd better put my formula as separate two of them make plenty of room with the wrap and slippers and stuff. Heavens, it's the new bulky, but you really spend time in it. This one ought to keep me warm. Now what else goes in here? Oh, my good dress, I don't want to leave that behind, nice and trips to City Hall and it. I still have to pack my slacks, which I wish I had some blue jeans and a plaid shirt, too. They're handy for Saturdays and field trips and picnics. Now we come to shoes. I'll just throw them in here. Let's see, before some people prefer maxcassins, saddles, with square slippers for the dance, and my pumps and dress shoes. Oh yes, my shower shoes and cap, right as well as it is here, too. I'll just stuff my socks around in here and I think I'll stuff this last pair of nylons. Now my coat, I'll wear my own head this time. I'm glad I have this coat now, though I don't wear it often. And of course my galandine nightdress is part of me. Oxford has a damp climate for weeks of a time. I wonder if my boots and umbrella can be squeezed in here. Oh, good! Well, I've got my clothes all in, except for the odds and ends.

Well now we come to the hard parts: how to pack all my own belongings, last year it was so easy. I just piled everything in the back of the family car and away we went. This year I'll have to use a real box, various piles and some discretion in what I take. This box ought to hold a carload, let's see, I'll put my rags and spreads and diapers in first. I remember what a mess the family car and I had with them last. We wished until we got to school to select them, but some of the girls didn't. We finally agreed on color and patterns, and I guess our room looked like something other than a cell. Funny, what a lot of color will do! It's easy to have diapers and spreads to put out with, though. I guess I'd better put my blankets in the box. The university grades tied them, thank heavens. Now my extra pillows, which are wonderful for lounging and being fact. Besides they add a homey touch and are wonderful for keeping up the appearance. Now for my dresser drawer, several good ones for a change. Where's I put my beauty bag? That's more than a necessity for dirty clothes. I kept half my wardrobe there last year. Maybe I can pack something in my laundry case. I really looked forward to that dorm thing. I never had so many friends as I did when my laundry came. I think I'll put my towels and washcloths in it. Something I forget for a year and had to send for was pictures. They really help to make a house a home. Of course I can't take anything large to hang up, but little ones can be hung from the molding. Oh, yes, here's my god of man's cloth for a combination butte-
WHAT TO BRING—MEN

Many things which you may have at home would only be (dis)advantageous and uncomfortable in your room at college, so make sure that what you bring will have some utility and will not spoil your college life.

Every room is furnished with a dresser, desk, lamp, closet, chair, and beds. The beds have two sheets and a pillow with a pillow slip. Since you will probably want fresh air you had better bring blankets along. If you like a "honey" atmosphere in your room, your own dressing gown, toothbrush, shaving kit, small towel, etc., and desk supplies will furnish that for you. Make sure that you include a loud alarm clock because if you have been in the habit of having your father or mother wake you up, you may find yourself cut out of your eight o'clock class because they were not there to see that you got up.

MOOD UNIVERSITY

Some physical education is required, gym shoes and socks are a necessity, but it is hot to walk and purchase gym shoes and shorts here because of certain uniform requirements. There are some ae.

communications for swimming, baseball, golf, and tennis in summer, and handball and ice skating in winter, so bring your sports equipment.

By now you should know what style and color clothes you like to wear. You need not have a large and extravagant wardrobe in order to be well dressed. You are required to have a clean view, wear well-dressed shoes, halfway decent trousers, a tie, and a clean shirt to dinner in all departments. A well-rounded wardrobe would include a suit, sport coat, two pairs of pants, a pair of shoes for classes and a pair of dress shoes, a tie, and a shirt or a reversible, and whatever ties, socks, shirts, sweaters, scarfs, and handkerchiefs you will need as accessories. Include a hat, if you want one. You will have to furnish your own towels and wash clothes. A bath robe will be put to good use as will also a pair of bedroom slippers. Since most of the big dances are formal, if you plan to attend them, you should include a few or tails and accessories. If you are going to send your laundry home, do not forget your laundry bag.
Exits your students booth to Oxford, Ohio, for their education. There is the beautiful campus of Miami University, famous for its high ideals, friendliness, and democratic spirit. Although Oxford retains a rural and simple look, it is really an urban in itself. Located on the hills of southern Ohio, Oxford is near several of Ohio's largest cities. However, Oxford's quiet atmosphere is reflected in the fact that it is just nineteen miles from Hamilton, twenty-two miles from Cincinnati, thirty miles from Dayton, forty miles from Columbus, and fifty miles from Columbus. The city has become one of Ohio's most important and attractive places for students. Oxford is also home to a number of businesses and industries, including a large manufacturing plant.

Miami University

ARRIVAL

LOCATION OF OXFORD

ARRIVAL IN OXFORD

Here it is at last-Oxford! It marks the beginning of the first stage of the journey, and a new and exciting life for you.

When you arrive, the first thing to do is to find your dormitory or cottage. You will be greeted by your housemother, a warm and friendly woman who will show you to your room and help you to get settled. There will also be a tour of the dormitory and its facilities.

The dormitory is a large, modern building with many facilities, including a large common room, a kitchen, and a dining hall. The dormitory is also home to a number of student organizations, including a choir, a band, and a literary society.

In addition to the dormitory, Oxford offers a variety of activities for its students, including sports, clubs, and social events. There is also a variety of places to eat, including a number of cafes and restaurants.

Many students find that Oxford is a great place to live, and many return to the area after graduation. Others find that it is a great place to visit, and that the city is a great place to explore.
yes if you ever have any questions or feel the need of advice, the and your counselors are interested in every girl and want to help you to adjust yourselves to your new environment as quickly as possible. Do not hesitate to talk to them and ask questions which might be bothering you (and we know there'll be lots of them), for they want to be your friends. They are not only walking information-bureaus, but also your guides and advisers. You'll find they invaluable sources of inspiration as well as information.

At the end of your first day, creep into bed as early as you can, for this exciting day is, you will soon discover, only the beginning of your many activities of Freshman Week.

Freshman Week:

Especially for you—remaining the first few days of school or Freshman Week as it is conveniently called—your arrival on Sunday, the day allotted for school to begin, is heralded by a large convocation in the evening at Bantam Hall, the administration building. You are given explicit instructions as to what to do and where to go. The Freshman Week committee now with only your counselor, proctor, and other upper classroom superiorly needed allowed here with you.

One look at your activities sheet and you are off Monday morning after another short general meeting with never a break in between, until Thursday night. After you have been separated into individual groups, classified according to schools and major subjects, you will find that every minute has been planned by the heads of schools, departments, etc., so that you may become thoroughly acquainted with the school. Its policies and plans, as well as giving you a head start on your social life. Among these many things there are the hours of the campus and the library to give you a quick idea of the two localities that you probably will visit most frequently. There are also the necessary psychological facts that you will take along with some prominent tests in various subjects to determine your ability in the respective fields. And speaking of tests, the physical exam can't be ignored that is given to check on any marks you may have made in your school—so don't forget your health record card that you gave to your nurse. Then during the last part of the year you've checked again to see just how many grades you've acquired. How many times you have done so well. And the best real duty you have to perform during
This week is payday where the financial arrangements are taken care of for your first semester. But if need be, you can polish it off. Especially if you strike up a conversation with the person in your cell who might be looking into this.

Now for a look at the more pleasant side of this eventful week filled with more riches and fines than you will ever know. The YMCA and YWCA do quite a bit to help you meet your new friends and get to know each other. If you're feeling tight, please stop by the YWCA for a free drink. The women members are always on hand to help and make you feel welcome. Feel free to bring your own.

"The starred items including laboratory deposits are pre-paid largely or entirely the first semester. All expenses listed outside the state pay an additional registration fee of $10.00 a year; twenty-five dollars due each semester.

From long experience in such matters the University suggests in its catalog a minimum of $1.50 a week for an allowance. It would be rather hard to spend more than $3.00 a week in Oxford, and this is cer-tainly a maximum for a weekly allowance. The amount of spending money you need will depend in a large part on you and your pocketbook. Perhaps you'll date
A lot. Maybe you won't date at all. However, don't waste on a boy friend pay for all your books.

Registration is an extremely important part of the fall day you spend in your life. Read the catalogue before you come to school. You may not understand what you say in your hours, or credits, but you will understand this the first third of the book will prove invaluable in selecting your required courses. By "required" courses are meant those necessary for graduation from a particular school.

Have an outline in mind of the courses you want to take before you arrive on campus. Don't wait until you are in a long line at McQuade and then try to decide which courses you'll like. If you know which school of the University you plan to enter, that will take care of most of your freshman subjects. It will also make things much easier for you and your adviser in your interviews. You may wish to choose your field of concentration with your first year, but it is not absolutely necessary.

Cute prepared to go sightseeing through pay-

line. Have a tentative course of study arranged so that you can easily complete your schedule with an adviser's help during registration. Figure out approximately what your expense will be so the total won't be a complete surprise. If you do these things to help yourself, paying and registration will be greatly simplified for you.

MİNİ UNIVERSITY

CAMPUS BUILDINGS

Even though most of the campus buildings are red brick, it doesn't take too long to be able to distinguish one from the other. If we start from Benson Hall, the layout starting point of anything on the campus, and continue on down Slott Wicks we'll see most of the different buildings and get a general idea of the entire plan of the University.

Benson is the hall where the president, vice-president, and all the administrative heads were their offices. The large Benson Hall auditorium is the venue of the weekly assemblies, various lectures, recitals and major dramatic productions. The auditorium has a seating capacity of 1,200.

Next to Benson is Bruce Hall—the home of the strong boys and men. Geology and zoology majors consider Bruce their special property. Each department has its own separate room, and it is not open to the public, in addition to its classrooms and labs. A large clock dominates the front of the building thus keeping any student from using the excuse "he didn't know what time it was."

Passing along Slott Wicks and the handsome Old Main, we see Harrison Hall, this building, formerly called "Old Main," was the first one erected on the campus. It houses the language, music, art, drama and psychology departments. The Tabori Theater, which has reputation dramatic productions are presented here, is in Harrison. The Commons, where students congregate, is on the second floor of the traditional building.

The library, located to the center of the campus, is usually open more than any other building of the University. Buildings become beast to be used during the day only.
in the library can be taken out after 9:30 o'clock in the evening and must be returned by 8:00 o'clock the next morning. All sets of periodicals are available to the students. More than 100,000 volumes are contained in the new library. Students who have stock permits may study in the stacks where there is the library's collection of periodicals and books not on reserve. The Scripps Foundation, in which research is made of popula- larity changes in the country, is located in the library.

Next to the library is Crane Hall where the depart- ments of the School of Business Administration are located with every one of the departments of the Liberal Arts Col- lege. The basement of Crane's usually serves of novelty with typhoons flying at tremendous speed, for it is here that the office of The Mountaineer and the semester student publications are.

If sculpture diode odor can be noted on the campus, it can undoubtedly be traced directly to Hughes Hall where there is one of the newest college chemistry labs in the United States. Seminar classes are taught in the chemistry building. Men of the radio naval training school hold some classes in Hughes.

A regular printing department has been set up in the industrial education building for students interested in the printing trade. The mechanical drawing, wood and metal working and automotive instruction depart- ments are also in this building.

The hospital is open to all University students. Stud- ents who are ill must be in the hospital in order to be excused from classes. There are beds for 40 patients. Insufficient space to increase the number in emergencies. No major operations are performed in the hospital but

are referred to Dayton, Hamilton and Cincinnati, not far from Oxford.

Going up the street from the hospital we can see McGuaffey Hall. McGuaffey is the new building for Oxford students. Here is the center of the University's School of Education. Education students now, most of their classes in McGuaffey and observe the McGuaffey students as a part of their teaching program. Many of the schools of Fine Arts classes are also held in Mc- Guaffey.

University dormitories aren't located in one particular spot, and none are one mile distance from the campus proper. Oxford College, for instance, is four blocks from the campus. Until 1928 this dormitory was Oxford College for women. Now it is Miami's largest freshman women's dorm. In 1931 the Oxford Col- lege group are Morris, Walker and Blanchard Hous- es. Girls who live in these closer dormitories eat at Oxford College. Two terms, fourth, line in back of Oxford College and one near Morris now, are for the student's use.

Immediately next to Blanchard House is the Linden Business Building. Here is the university's library and refectory-meat plant. It is in this building that the food is stored and distributed to the various dormitories. Hepburn Hall, located in the heart of the campus, in the oldest women's dormitory and it now houses fresh- men women. The YWCA offices are in Hepburn and help to make the dorm a center of activity.

The student dormitories, East and West, until this year housed 396 freshman women. However, they are now occupied by a unit of WAVES who moved in last spring.
Tallwoods, until last year a private apartment building, was converted into a dormitory for upperclass women. Located directly above Taffy’s it’s somewhat difficult for the girls who live in Tallwoods to reach having a last minute wanted roll or rice before the final 5:00 o’clock bell rings.

Crossing the campus from Tallwoods we can see Bishop Hall, another dorm for upperclass women. Bishop is new to the library and it has bonding facilities for 11th. The Dean of Women resides at this dormitory.

Wells Hall which houses 64 upperclass women is on the same street as the hospital. A ten-footing pitch is more than in demand in the spring by university girls who battle to see who can get the best tan on the Aquatics. A lively smell at the side of Wells is the scene of many times and has during the first few weeks of priest.

The two newest and most modern dorms for upperclass women are North and South. These dorms are quite similar in appearance and overlook the girls athletic field. Security units are in North and South and the Pan-hellenic offices are in South. Both of these dormitories have kitchens and attritious lounges and social halls.

The Pines, which used to be a women’s dormitory and Fisher Hall, formerly a freshmen men’s dormitory, have both been taken over by men of the U. S. naval training school who consider the dormitories as “sheds”. When they leave the building that formerly housed university students, they “go aw-hom”. They speak of the floors as decks.

In the same location of the Pines and Fisher is New Men’s dormitory for freshmen men. It is new and modern in every respect. In back of New Dome are the lovely fisher gardens where beautiful flowers and shrubs are growing. Anyone visiting the campus enjoys walks through the well kept gardens.

Dorm freshmen Row is another freshmen men’s dormitory—David Swing Hall. An illuminated tower and clock makes this dorm easy to recognize.

Withrow Court, a well-equipped gymnasium is the center of men’s athletics. The large division of the year is the Athletics Senior program, basketball, boxing, gymnastics, crew, and campfire assembly of the year are held here.

Leaving Froshmen Row, no new pant is because of the numerous fraternity houses as the street, and going block on the campus again we can see three dorms.

Gilded, Eller and Shotwell Halls normally are occupied by upperclassmen, but this year they will house apprentice women in the V.C.E. program.

Signs in what is known as lower campus are Partick Hall was the girls’ gymnasium. This year, however, the girls’ gymnasium have been moved over by men of the U. S. naval training school who consider the dormitories as ‘sheds’. When they leave the building that formerly housed university students, they “go aw-hom”. They speak of the floors as decks.

In front of Herron Hall is the Bell Tower, which rings every quarter hour. The bells can be heard from the further corner of Oxford. The tower with.com. posed on the campus grounds by 3rd Theda Pi fraternity.

Bishop House, up the street a block from Tall-
M.I. BOOK

M.I. UNIVERSITY

SCHOLASTIC REGULATIONS

The amount of work to be carried by each student varies in the different schools and in the different courses. On the average a student carries from 15 to 18 hours per semester. Freshmen may carry more than 17 only with special consent and all students must carry more than ten unless they have the consent of their dean.

Grades are determined by the combined results of examinations and daily recitations. Of these, A signifies excellent scholarship, B, good; C, fair; D, poor; E, inability, which may be removed by a second examination; F, failure, removed only by repetition of a subject. Inc. denotes that the work has been in-complete and may be removed at any time during the first six weeks of the succeeding semester. If so removed, it automatically becomes on E. A carries 4 credit points; B, 3; C, 2; D, 1; E and F, none.

Senior majors in Physical Education yield credit points to freshmen and sophomores only, at the present time. A proposed extension of this by the entire four years is being considered. Courses in Home Economics yield full credit points for Music and Music Education majors only; for other students they count two credit points per hour passed, regardless of the grade.

All grades are reported to parents or guardians at the end of the semester.

An analysis of grades is made by various committees of advisors at nine weeks and at the close of each semester. A freshman who has not secured at least 19 credit points, or an upper classman who has not at least 26, may be placed on probation by action of the
A student once placed on probation may be dropped at any time if his grades fall below the probation standard. Anyone who has been dropped twice for low scholarship will not be reenrolled.

A freshman must have earned 45 credit points during his freshman year in order to remain as a sophomore. A sophomore must have earned 55 credit points in order to remain in the following year.

A student who is dropped for scholarship in June may attend the summer sessions, provided that he has earned at least 40 points this year if he is a freshman; and that in the second semester he has met the probation standard of 19 points for freshmen, or 26 points for seniors.

If he earns six hours of credit in the summer session in courses which he has not previously taken and makes at least a grade point average of 65, he may return on probation in the fall. However, his suspension may be extended up to one year later if necessary.

A student enrolling in the summer session on probation will be dropped for scholarship in his class if he fails to maintain a C average or better.

An appeal is made in the Registrar’s office of all high school records, and freshmen who have been in the lowest third of their graduating class or whose average grades are below the minimum set for recommendation to college by the high school itself, are notified that their work in college will be followed carefully by their recruiters and advisors. Freshmen enrolling on warning will be on the warning list until they have a satisfactory grade report. Until removed from

Miaml University
Two types of courses are offered, and under this broad setup, four vocational areas are provided: (a) mechanical, (b) business, (c) household arts, and (d) production industries.

The semi-professional curriculum is intended primarily for the following students:
1. Students who for one reason or another cannot attend college for more than two years, plus the vocational needs can be more adequately met by the offerings of this two-year course.
2. Students are admitted to this curriculum only with the approval of the academic council.
3. Students whose academic background is such that success in a college or professional course is doubtful.
4. Students who have failed in the degree program but who have been recommended for the semi-professional course by their advisors and whose transfer is approved by the Academic Council of the University.

A complete description of courses of instruction for this two-year curriculum can be found in the University catalogue.
Dormitory Life for Girls.

There is nothing like it. Of course, I am speaking of life in a girls' dormitory. You have heard about it, read about it, and maybe even experienced a little taste of it by visiting, but until you've settled down in it you can't imagine anything that would compare to it.

First and foremost, you are queen of your half of the room—which doesn't sound like much until you and your roommate done your Saturdaylicks and start to clean it on that particular day when classes are few and tasks are many. There's always the washing of a pair of panties, socks, or a toast ring of a dish the last day of the week or for that matter right after the exam. It's not as if the laundry equipment is not provided for such purposes or that it is only washing and ironing if you're that ambitious. But some prefer to "sleep" on Saturday and spend an afternoon in a pleasant spot or walk or afternoon date taking up the day. Then Saturday night, big date night, our time those precious hours, on git the feel, and out on the girls. Of course, all this has been thumbed by read several times when you're right in the middle of a shower, and hurried conversations be- between classes. When the curfew at 11:30, with special permission for dates, the sprawl creeps snoring out the mouth, as well as tossing the dishes in the sink, sit around the room, sing and discuss topics of a worldwide interest—usually men that sometimes the topic broaches into religion, those good old times, or family troubles and such. And believe me, if you have ever been among a group of girls living in their 20's with food at your elbow and somebody asking to wear your sweater tomorrow, then you really belong.

But if it is not play, there's work to be done in the dorm too, for which the hours of 7:00 to 10:00 and 10:30 on are dedicated. These are the renowned "inlet hours," and if you forget and get too noisy you probably will be reminded by one of the proverbs that live in the dorm with you. These proverbs, girls chosen from the group that lived in your dorm last year, because they were thought most capable to show you the ropes of college life and to advise you in the many little things which you wouldn't want to bother your head of Hall. These girls are, in turn, ad- vised by the two senior girls in the Hall—House Chairman and her roommate, Junior Counselor, who prove their worth three times over. These are some of the books that seem to have the most amount of "inlet hour" booklets.

Yes, your dorm is one of your most important two books in your college career.
RULES AND REGULATIONS

Here at Miami you will find there are few restric-
tions, and even those that do exist will be found to be
consistent with your own ideals. There is, however,
a small list of regulations which are typical of uni-
versity life.

In the first place is the "no car rule," it is a rule
of the university that students may not maintain au-
mobiles during their residence in college, however,
special permisison are granted to a few students who must
maintain cars for business purposes. The only legitimate
social use of a student car is by permission from the
office of the President of the university for a special
tension. You'll soon find you will not mind the taxi or
car, because everyone from President Uihlein down
walks and walks and walks.

Secondly, the univrsity rules speak only to the
girls. The maes are allowed to drink the dooms hours. The
doors of all the girls' residence halls close promptly at
ten o'clock on six nights a week. On Saturday nights,
however, they are not closed until eleven thirty. Of
course, some permission may be secured for attendance in
activities, freshman dances, and the big dances of the
year.

Along with the regulations for the closing of doors
comes the scheduled "time for study hours until quiet hours.
In all the freshman girl's dorms there are established
evening quiet hours from six forty-five and
again at ten thirty until the early birds arise at six
forty. Thus, to encourage the girls to get as much
studying done in the afternoon as possible, there are
quiet hours up until four o'clock.

All the girls on the campus are asked to sign out
if they leave the residence halls at night or if they
leave home at any time. Car clips and over night
count pins must be filled out other permission is ob-
tained from the head of the hall for our ride will
over night absentees in Oxford. Written permission from
home is necessary before you can spend the weekend
at your parents' home or for any other visit at town
absence. Permission, however, is not required when go-
ing to your own home.

Girls may entertain their sister, the best girl friend
from home, or any other guests in the residence halls
over the weekends, while staying in the dormitories.
the guests are required to obey the same rules regarding
quiet hours and signing out that governs their housemates.
All guests are asked to sign on registra-
tion cards which are provided in the dormitories.

Although there is no general university rule which
prohibits girls of Miami from smoking, there are some
restrictions placed on the places where the girls may
smoke. It is accepted rule that girls do not smoke
on the streets or on the campus. Smoking is not per-
mitted in the dormitory rooms, but is restricted to the
smoking rooms provided in the residence halls.

To help you get "into the swing" of your classes,
freshman girls may date once in the afternoons and on
week-ends during the first semester. If your grades for
the semester average a "C" or better, though, you may
date on week days as well as on week-ends during the
second semester.

As students are asked to wear clothes suitable for
archery or sun-bathing only on tennis courts, the golf
green, other athletic fields, or any places especially set
apart for such.
MIAU UNIVERSITY

MAIA'S SOCIAL LIFE

You'll find at Miau a well-rounded social life and one that's suited to everyone's tastes. There are any number of activities always going on and the social calendar is filled with good things. Miau's social program offers almost unlimited opportunity for friendships, entertainments, and good times.

Through the year dances and mixer dances are frequent. All students, freshmen included, are invited to the Varsity dances and we hope there will be assignments here to support a Varsity which is held on Saturday nights. Everyone is invited to the AMI新年 dances, which are on Friday nights. On Saturday nights the YWCA and YWCA entertain and everyone is invited, with or without dates, for dancing, games, etc. Freshmen are invited to the Sophomore Hop, the Junior Prom, and the Senior Ball, with late registration for the girls and the chance to wear your formal or not.

Our pleasures at Miau are simple and joys and perhaps you'd rather pursue a sport. There are tennis courts available, a golf course next campus, links to sea, and a municipal swimming pool so you can go boating, by the Spring and fall there are long walks to be taken along picturesque paths. You may want to take a picnic lunch along or some of these excursions which are particularly fun for a foursome.

At Miau, you'll form warm friendships and these friendships are an important part of college life. You'll want to date—and it's enjoyable, too, frequently read-
"M" BOOK

As a lifetime association! You'll want to enjoy the many social affairs together, the various social events and get to know our teams in the goodnews. In your college you will
choose type of date in the "date" date. This consists of evening or girls and spending a time and
time taking over a date. However, girls, remember that the supply of fellows available on the Main Power Com-
munity and the dates at the Bowling Alley.

Mrs. Virginia Kerr Snoddy whose office is in Ben-
son Hall is the social director. She helps coordinate plans for the larger social affairs. Of necessity, for
which the university social programs are used and scheduled through her.

You'll enjoy the social life of the campus and you
will always remember the good times and friends.

MIAMI UNIVERSITY

EXTRA-CURRICULAR

College, as your planned, have probably told you
by this time, is primarily a place to get an education.
There's just no way of getting around it. But even a
potential Ph.D. can't study all the time. And so, for
those same minutes, even evenings, and hidden hours,
we have extracurricular activities.

In a school as large as Miami, it's only natural
that there should be a wide range of activities to ap-
pel to every conceivable interest—church groups and
the Y's to foster youthful fellowship, service committees to
recognize outstanding achievements, and publications
for the aspiring journalist.

If you're newspaper minded, wonder down to the
Miami Student office in Room 9 in Hulbert Hall, and a se-
niors' desk officer will put you to work. In a few weeks
you'll learn to love the smell of printer's ink and the
sound of rolling presses. And by the time you're a
sophomore, you'll be pounding out copy like a vetara.

Editorial: As Miami's yearbook. All year the Bo-
cestry staff toils away in the basement of Fair, work-
ing on photographs and layouts and continually fresh-
men take care of the final work, striving to be ap-
pointed office managers for their sophomore year.

The "M" Book is planned and edited by students
through the YMCA and YWCA. We call it the "Fresh-
man Bible" and you already know how important it is.
ORGANIZATIONS

For students who desire to follow their interests in courses beyond regular class work, honoraries in all departments may be found. Scholaristic achievement and distinction are the usual requirements for membership in most of these organizations.

Beta Pi Theta, in the language department, is a national French honoray. The work of this group is devoted to the promotion of French culture, literature, and philosophy, as well as the language itself. Established at Miami in 1935, Delta Phi Alpha was founded for those whose interests lie in the field of German. Associates with Sigma Delta Pi, national Spanish honoray, lump a sincere knowledge of Romance literature, Spanish culture, and a background interest in corresponding careers. Membership in the Sigma Phi which is a classical language honorary, is open to those having a "B" average in all Latin and Greek courses. The encouragement of appreciation for the classics in the main objective of this group. Closely connected with the Sigma Phi is the Classical Club which promotes interest in Latin and Greek culture. All students excelling in Latin and Greek courses may become members. Many markets for Liberal Arts majors may be found.

To reward outstanding achievements in psychology as well as to recognize high scholastic standing in general, the Miami chapter of Pi Chi was installed in 1940. Practical problems in psychology are studied at the meetings of this organization. Students having a "B" average in all courses and above a "B+" average in psychology, may apply toward Alpha Kappa Delta, national psychological honorary. Interesting lectures on current work of psychologists are sponsored for the benefit of members. The international structure is composed by the Cosmopolitan Club. Among its activities are the annual symposia sponsored by foreign affairs agencies, the membership, and to individuals in Latin America. Requirements for belonging include a 3.75 average and the recommendation of a professor in the department or economics department. These meeting is debating and public speaking in Tau Kappa Alpha.

In the spring of each year, Liberal Arts/Meteorology is the only men's honorary open solely to seniors. At least 1/2 hour of English, 40 percent of the grades being "A" plus a general average of "B" is required for membership.

In the field of education, students maintaining a "B" average in the School of Education are eligible for the national professional honorary, Kappa Delta Pi. To further study of the principles of higher education is the aim of Kappa Delta Pi, whose members are interested in educational problems. Prominent authorities on educational work are speakers at meetings of the Association for Childhood Education, founded at Miami in 1940. Members attending in the educational education sessions may be eligible for admission to the University.

Directors of educational interests are several honoraries conferring excellent opportunities for knowledge within the classroom. Opportunities include psychology, history, or geology are conferred on Kappa Delta, a further stimulation in national science, national authorities speak at its regular meetings. Geology meetings having a "B" average may belong to Sigma Gamma
Many fine contacts and new friends are made through Speaker’s Bureau.

High school dramatics proved to be such fun that now you are interested in the Theatre of Miami. Many banding in freshmen players may be acquired by try-outs. Casts, as well as scripts, are of importance. Several plays are produced each year in the little theatre under the direction of a professor in the Speech department. Be on the lookout for notices of try-outs.

The dramatics department also has an honor society, Theta Mu Eta. Here too, make-up artists, publicity agents, properties crews, etc., are of importance as the work of the Katharine Cornell. Theta Mu Eta is looked after by the Speech department and presents outstanding plays each year.

Rarities throughout the various dormitories and fraternity houses is a library of selected books. One thousand dollars was donated in 1937 by the Student Faculty Council for this purpose. When you have nothing to do or read books at the last minute for a book review, check the thirty or fifty books in your seat.

Every six weeks the books are replaced with others, thus getting its name, "Traveling Library." Beginning three or four weeks after school has begun is a series of Saturday afternoon extravaganzas known as "Vigilantes." Beads are bought from Clincy or Dayton to furnish good masks. Variety shows are obtained by having novelty dances such as western hops, and a formal dance is sponsored by the Society Social Club each year. Tickets are sold in dormitories and fraternity houses by representatives of the ISC. On campus election days, a nephew-

More is chosen vice-president of this organization who
It supplies the musical background during the half or basketball games, in addition to giving concerts during the winter season concluding with a formal concert in the spring.

DELTA CHI KOLON

If you're the girl who ends up with a 7" tail in your music course and at least a "C" average in all your other work, you may be invited to membership. The group is active in the community for women.

GLEE CLUB

The Glee Club was the place for the freshmen and upperclassmen who wanted to sing and could sing, when the men were around to sing. The personnel increased as alarmingly the past year and there being no replacements in sight the Glee Club merged with the University's mixed chorus, chimes, in the past the Glee Club made annual tours through the state singing programs of various high schools. The other half of the merger, Minstrels, is for the people who like their part singing with mezzo-pies, all the way from bass to first soprano. Both groups gave concerts throughout the year and this year are giving a joint formal concert. Tryouts are held early in the year at Bishop House.

ORCHESTRA

If you have the yen to play a piccolo in a symphony orchestra the University Orchestra is the place for you even if you aren't a music major. Tryouts are held early in the fall and those with the ability are chosen by Dean Joseph W. Chichey of the School of
Fine Arts who is the conductor of the orchestra. The group gave standard symphonic works at its concerts throughout the year which ended with a formal concert.

PHI MU ALPHA (Sinfonia)

Phi Mu Alpha is a national music honorary for men students who have been outstanding in the field of music. Each year the group sponsors the Interfraternity sing which is held the evening before Mother's Day.

MAGDALENA

Magdalena weekly includes the best women's voices on campus, and it is the outstanding women's singing group. Also, Dora Lee of the School of Fine Arts is the director and selects the new members each year at the auditions held in Bishop House early each fall. Throughout the year, they present very popular programs at assemblies and one formal concert late in the year. Previous to this year the club was located for a tour through the northern part of the state in the spring.

PHI NTA KAPPA

When we write to student wearing a gold key with the letters Phi Delta Kappa you can see fairly certain how what it takes scholarship particularly if the secret in comprehension is a junior in the three. Phi Beta Kappa was one of the first Greek letter societies in America having been founded at William and Mary College in 1776. It is a national scholarship honorary in membership is based on scholarship and high academic average. Juniors having a 3.75 cumulative average are eligible for admission at the end of the year. While seniors are required to have a 3.5 average.

There are quite a few Phi Bis in Miami's un-

PHI ETA SIGMA

Phi Eta Sigma recognizes men who find themselves with an average of 3.5 or above are eligible for Phi Eta Sigma, national scholastic honorary for freshmen men. They may be selected within one semester of the first year. This group offers awards to individuals and organizations who are outstanding scholarship. Scholarship is stimulated by the group tutoring plan carried out by Phi Eta Sigma for all interested people who need they need some help on the rocky road of learning.

OMISSION DELTA KAPPA

The piping ceremony of CKC sells an extra ele- ment of surprise to the Sophomore Hop and the Sen- ior Ball. At these times junior men who have been outstanding in service and scholarship are invited to membership. This past year many were tapped at the Junior Prom since many of those eligible were likely to be tapped into service before the end of this year.

MORTAR BOARD

After three years of keeping up a good point average and serving in various capacities a junior may find himself wearing a black mortarboard at the May Day ceremonies. Every May Day about twelve junior girls who have shown themselves outstanding in service,
leadership, and scholarship are tapped for membership in this national senior women’s honorary. The members of this group continue to serve the college by operating a system of tutoring, and working with freshmen in investigating untapped opportunities for college women. They honor exceptional women who have earned “B” averages, support coffee to acquaint freshmen with their program, cooperate with ODK in planning Homecoming, and assist in Scholarship Day.

CWEN
Three sophomore girls who wear small gold crowns and sash are members of CWEN, national alphi- omega women’s honorary. They are tapped on May Day of their freshman year, membership being based on scholarship, service, leadership, and character. CWEN sponsors flower sales at football games on Dead Day and Homecoming. The past year they sponsored a Defense Stamp drive, in addition to assisting Mortar Board in one of their service projects.

WOMEN’S LEAGUE
Women’s League, a national organization which serves as women’s governing association, includes every woman student at Miami. The executive body of Women’s League is the council composed of an president of chairmen, presidents of women’s clubs, presidents of departmental clubs, and house—women, and the president of Pan-Hellenic Association. Freshmen are first introduced to the League during Freshmen Week, and less than other interest get-togethers while the League sponsors the Women’s Move as part of the orientation program and later in the year presents a backwards

MIAMI UNIVERSITY
dance to which the girl invites the man she has been wishing she could ask for a date all year.

Women’s League has set up a peer system attaching points to each of the positions on campus and specifying that the girl may occupy positions totaling more than ten points at any one time. This is for the protection of presenting one girl being burdened with too many responsibilities. The duty of the Women’s League is to see that this regulation is not violated.

AIRI
One of the largest organizations on campus is the Association of Minorities. Indoors—men being composed of all interested and uninterested students. Any eligible student may attend the bi-monthly meetings on Wednesday evening in North Recreational Hall. Members may attend the evening and fall formal in addition to the other parties, picnics, and social dinners. The AIRI is represented politically as member of the party that has won many class elections. The voting and policy forming body of the organization is the council, composed of one representative elected for every twenty-five members.

MIAMI CREST
The Miami Crest was established in 1922 in order to continue the formerly numerous requests for contributions to charitable organizations. The existence of many separate drives for contributions becomes annoying to the students and faculty members and for this reason many of them were unsuccessful. The Crest system sets up a budget which allows a specific sum to each organization benefiting from the drive. This one drive is held early in the fall and the royalty and students
The Business Staff, in subscriptions, collects the money, sells ads, and distributes the books. Plus keeping all accounts reasonably straight, the system of promotion on the Business Staff is similar to that of the Editorial staff which was described above. The Business Staff has a circulation of approximately 90 per cent of the student body, which is not unusual for the books in question. Another Outstanding fact about The Blue and is that in all its approximately 50 years of publications, it has never been known to meet its deadlines.

Any students attending Miami University know the morning papers of the day as it affects college students, keeps the campus informed about athletics, meetings, social events, and all the news you and the rest of the world when your best friend has a date with your favorite sweetheart.

Vesul of the Editorial Staff, which attains and writes on these momentous events, the Editor of The Student acts as chief coordinator and supervisor of the activities of the staff. A senior who has worked all his college life on The Student, the Editor is likely to be of the Abraham Lincoln type, convinced and well, but committed to carry on.

Any students who cherish the memories of wearing that vanishing look of reverence for the Editorial Staff hold early in the fall. From this time on, he will write headlines, sound a beat, proofread, and be initiated in the mysteries of The Oxford Printing Company, where The Student is printed. Outnumbering sophomores are Dean Editors, and after all, more weeks, may cut, several parties, are appointed from Editors. From the new Editors, the Board of Publications selects the Editor-in-chief. The University
The Business Staff handles advertising and distribution. The freshmen on the Business Staff deliver the paper to the different dorms and residence halls. Sophomores solicit and collect for advertising and sell the patron worry advertising which one of them will be Business Manager next year.

Appointed by a combined YWCA and YMCA committee, the Editors of the "WM" Book usually spend two-thirds of the year compiling the issue, and the rest of it in feverish activity, as may deadlines get closer and closer.

This feature that you now hold in your hands, or have already filed in the weekend basket, is none other than that publication. It is sponsored by the WM and WM, and is designed to give the freshmen some prior orientation to college. It includes written ads on every phase of campus life, organizations, scholarships, bookstores, fraternities, and even a few tips on the social side.

Two sections were approved as co-editors in the fall of 1962. Unfortunately, in the spring of 1963, the male half of the executive staff suddenly left school at the instance of the Army Air Corps, leaving Joan Clay Cole in charge of article assigning, rewriting, and worrying.

The Business Staff has charge of the advertising angle of this " bible, " also taking care of selling the copies.

YWCA

You will be especially aware of the YWCA during freshman week when the members will help you find your way around, help the leaders of your groups and cost you in various other ways. Hepburn Hall is the center of all major YWCA activities, and here all students have the use of the "YW" telephone without charge. "Dee" Stephens, the very capable and pleasing YWCA secretary, has her office in Hepburn, and you need come to see her and become acquainted with her and the Y cabinet members who will be there to welcome you during your first days at school.

The YWCA lending library is also located in the executive offices at Hepburn. There is a wide variety of reading material available including books, magazines, periodicals, pamphlets, and the daily newspapers to increase your knowledge of America's role in the world theater of war and peace.

If you want relaxation rather than a discussion of world events, a cozy bar from the Y store or if there are any girls born to sell this year, and the Hepburn palor to dance in as you near the Madisonville or the Interfraternity, it may prove sufficient.

In past years the YWCA has been organized on a co-educational basis, but is now working in an individual field of interest as it will be more conducive to the campus-wide accomplishment of the Y as a group.

Certain changes are predicted in the activities of the YWCA as so much of the rapidly changing world situation. The students feel restless and uncertain as to what effects the war will have on their everyday lives.

There is a need for a stabilizing force to meet the "worry" of the students and of the various groups of
"M" BOOK

The mood services now started at Muni, as well as those expected next year.

The role of the Y must be altered to meet the demands. There are to be in 1943-44 more joint programs and activities of the YWCA and YMCA with the two organizations working together. Such ideas will be placed on discussion groups and the entire of us all, friendly themselves. The work of these two groups will be closely allied with the work of the Oxford churches. The program of the YWCA has been planned by these principles.

1. Assisting the youth adequate for the future.
2. Understanding the issues of war and peace.
3. Achieving solidarity of personal relationships.
4. Choosing means to end social freedom.
5. Assuring civil and community responsibility.
6. Meeting the needs of those whose eyes are dimmed by war.

Membership in the YWCA is open to all girls who wish to participate in YMCA work and who wish to work together for the principles of fellowship and Christianity behind the organization.

Don't forget to come to Hampden office soon after you arrive in Oxford. The YMCA will be expecting you.

Y.M.C.A.

Jan Newcombe was walking down the street with his pal, Dick, a former Muni Freshman now in the Navy.

"I received my "M" Book today, Dick.

"Well, I suspect by now you have read it through."

MIAMI UNIVERSITY

"Not yet, but I've started. Just one thing, though. I saw something about the Y.M.C.A. Do they even have the "Y" at college, too?"

"You bet. Of course it is a bit different from our "Y" down town, but it is just as busy on the campus as it is here."

"Uh oh, tell me, where is it located?"

"The office, the name center of the Association's many activities, is located in Ogden Hall. As the rooms there are now required for offices for the V-12 Unit, the Y.M.C.A. headquarters must be established elsewhere. At the time of writing the prospects are that the new location will be the first floor of the Phi Delta Theta House, and that Miami's Director of Religious Activities, Dr. A. C. Wickenden, will give immediate supervision to the program. But you ask me, "Where is the Y?" The answer is that it is all over the campus in the form of students who are active in its work."

"Work! What kind of work?"

"Almost every kind. See, its purpose is to help students live a broader, more worthwhile college life, and that covers almost everything: for instance, before I entered Miami as a "M" Big Brother wrote to me during the summer, giving me a lot of friendly tips on getting along at school. I was invited by the "Y" to a three-day camp for a group of freshmen, during Freshman Week. "Y" men served as group leaders and invited every one to a Mixed Mixer sponsored jointly by the Y.M.C.A. and the Y.W.C.A. Even your "M" Book is a Y.W.W. publication."

"I decided to join the freshman Y; our program included several interesting meetings of both serious and social nature. There are a number of committees
On which floor we serve, I chose the social committee, which was responsible for planning an informal open house to be held jointly on Saturday nights for all students by the YMCA and the YWCA. We always had dancing and cards and ever so when we arranged a floor show or special program. You know, you can make a lot of friends among fellow and girls working on these committees. When I bought my books, I found that I could buy many of them cheaply at the Y's Vint.

Religious groups on campus

At Miami the need for fellowship within religious groups is not overlooked by the churches in town which sponsor societies to supplement the work carried on by the Miami Religious Council. Reverend Eugene C. Walker, pastor of the Presbyterian Westminster Foundation which provides for students res-

June and other activities on campus are planning and correspondence. The Church House, which is the center of activity, is equipped with a radio and reading room. The activities of the Lutheran Students Association.

The Catholic Newman Club on campus strives to
keen Leonard standards of culture and high morals, they plan varied social activities during the year.

Those of Jewish faith are brought more closely together by the Hillel League which provides social programs as well as discussion groups for the membership.

SORORITIES

Sororities at eighty are a little different from what you may have imagined. In the first place, we don't have sorority houses. The girls live together in dormitories and apartments, and the sorority suites in North and South Halls are used only for meetings and social purposes.

Because of this, there is less emphasis on sororities here than in many schools. It really doesn't matter whether you belong to one or not. Of course they'll seem terribly important at first. During washing every one is excited over initiations to parties and the lovely bids and trying to decide which she likes best. And in some ways, sororities are important because they offer you companionship, a chance for leadership, and an affiliation with people like yourself.

But after the first excitement of the first few weeks has died down, they don't seem to matter quite so much. Even if you didn't join a sorority, you were terribly appreciate, you just begin to realize that you are find friends and companionship in dorm life. You look around and wonder that many of the most outstanding leaders in a group are independents.

Sorority activities are directed by a Pan-Hellenic council, and any questions should be addressed to the Pan-Hellenic office in North Hall.

MIAMI UNIVERSITY

Rushing begins Saturday night at the end of freshman week with open houses in all the sorority suites. The next two weeks are devoted to a visiting council of men and parties held either in the suites or in fraternity houses. During this time, you try to decide on the one in which you feel happiest and most congenial. At the end of the two weeks, you turn in your preference card to the Pan-Hellenic office and wait breathlessly for the happy day when your pledges are announced.

The sororities now active on the campus are:

- Alpha Chi Omega
- Alpha Epsilon Phi
- Alpha Chi Omega Pi
- Alpha Delta Phi
- Chi Omega
- Delta Delta Delta
- Delta Delta Phi
- Delta Gamma
- Delta Sigma Phi
- Delta Zeta
- Kappa Kappa Gamma
- Sigma Chi
- Sigma Lambda Chi
- Zeta Tau Alpha

FRATERNITIES

An article on fraternities must almost necessarily be written in the past tense. At this point no one knows what the stories of fraternities will be next year, but it is very probable that they will exist as they have in the past. Houses will probably be closed or used by some other unit and the organizations will be talked about as a thing of the past.
University sponsored lectures on topics relating to foreign lands. The subjects related to both historic and current problems. Last year such well-known authors as Robert Frost and S. K. B. Wodehouse visited the campus. The English Department sponsored them as well as other famous contemporary writers. Plans for the coming year are being formulated by the Social Science Department. Although the unavailability of the time may prevent the year's program from being as full and varied as in previous years, an effort is being made to obtain the best lecturers possible.

ARTISTS' SERIES

Through the Artists' Series, Miami students are given the opportunity to witness some of the world's greatest musicians and performers in various fields. An invitation from the student activity key, to which each person contributes, enables every student to share the privilege of attending these performances. This past year Gladys Swarthout opened the series with her concert in Whalen Hall. The nominal sum of one dollar purchased a season ticket to hear persons who travel from all over the country to speak to Miami's student body. After overflowing in their fields, well-known lecturers, and writers are included among the notables welcomed to the campus. Two years ago the modern language department of the
GRd's Sports

Every Miami student is required to take two years of physical education, and she has a variety of sports from which to choose. Her choices must include one year of team sports, one non-team, and two individual activities. The sports year is divided into fall, winter, and spring. In the fall, volleyball, tennis, canoe, and water ski are offered; in the winter, tennis, basketball, and track are offered; and in the spring, sports include handball, badminton, and croquet.

Department

Why not become acquainted early, with the sports of the department? You'll find them ready and willing to help you in any manner you may. Miss Phillips is probably the first instructor you will meet during freshman week. She is the head of the department, and is continually counseling some bewildered student as to which sports is best for her. She will help someone select the sport that she would be most interested in. You often find Miss Shaw, often in charge of a new dance routine or explaining something about the techniques of the game. You can also see Miss Bryan in the gym to start you on that extra-curricular volleyball, basketball, or base ball tournament. Miss Bessant is the leader of those women who have really taken to enough. She encourages the camps who go on camping trips, which mean

Miami University

Physica1 Examinations

One unforgettable phase of freshman week is your physical examination. Next fall you will stand in line for hours, seemingly. In addition to the regular check-up, your posture pic- sure will be taken and perform defects noted. Somewhat to your dismay, you'll discover that you are a pretty fair specimen after all.

Physical Fitness Program

Health is strength and strength is victory. With this in mind, Miss Chuck decided to get some measure- ments rolling on the campus. They put their liberal arts, educational, and team sports together and planned a program for conditioning and reconditioning that would make even a Phi Beta look up from her book. Every association, club, or campaign has a consti- tution, code of laws, or platform of some kind or its foundation, and so the physical fitness program has to have a group of six essential commandments for their followers to live by and obey. They are:
1. To accept the obligations to keep this- self physically fit.
sports that continue all year around. This yearround participation is a feature of the Saturday afternoon co-recreational sports, for the girls may bring their dates in for some badminton or ping pong on Saturday afternoon during the year.

W.A.A.

One of the very active organizations on campus is the Women's Athletic Association. It is this group which sponsors extra-curricular activities in women's sports. In the fall it is lacrosse, hockey, volleyball, and archery which are the fields of competition for interschool tourna-
ments. Basketball leads the winter sports program, fea-
turing sports and independent tournaments and a class team competition. Ping pong, badminton, bowling, and fencer tournaments are also included in the winter schedule. The season is closed by a Varsity Party at which time awards are presented to the outstanding athletes. Spring days bring track, golf, baseball and archery with tournaments offered in all these sports. With the rating of times and good luck, a great many women have become hiking and bicycling enthusiasts. Participation in all and any of these activities can earn you points for the W.A.A.

Physical education and physical fitness both center around that pleasing and healthful combination of your anatomy, known as good posture. At the annual pos-
ture contest, a high-light of the year, a group of se-
lated contestants perform in all kinds of situations—
work, play, exercise, dancing—before competent judges as well as spectators. The lucky winner receives a year's subscription to Vogue Magazine. This is another of the many W.A.A. yearly activities.

MEN’S SPORTS
AETHLETIC POLICY

With the present World War having placed the
future of college life itself in a very questionable posi-
tion, the role of intercollegiate athletics become even
more important. With the transportation problems as
well as the manpower shortages drastically affecting the
style of college athletic pursuits, the Senate of the
University annulled their position with respect to
athletics in a resolution passed on the 17th of January.
The resolution stated:

The senate is not elected to study the adminis-
trative or intercollegiate athletics recognizes
the obligation of the University to all its men, and
strongly urges that the physical fitness of every man
be kept as the concern of the Department of Physical
Education.

2. The committee recognizes also that competitive
sports do give training to the war effort to those who participate in these and recommends there- fore that intercollegiate competition be continued sub- ject to such changes as may seem expedient and neces- sary to the Athletic Committee.

With these aims and views in mind, the Physical Education Department continued the improvement of the type of work-out and drills in "gym" classes and practices in track, tennis and spring football programs which was conducted throughout the season. The intramural number of teams, the "men" was even greater than usual.

The policy for the 1934-35 year will naturally depend on the availability of playing field to various sports as well as the availability of players. The already announced policy of the Navy with their V-12 to participate in all extra-curricular activities for which they have time, strength and interest will leave those men so inclined available for college athletics. However, the policy for the coming year still remains a high question-mark.

MIAMI COACHES

Coach "Stu" Walter, former star and captain of the football team at Ohio State, came to Miami from Westinghouse and Jefferson University to take over the local and high football coaching. He reported a lot of interest in the teams which developed rapidly as the season progressed. (9)

Coach Sidney Gillman was an All-American and 

FOOTBALL

With the great changes taking place in the colleges and universities all over the country, it would
SO, you’re off to the higher halls of learning. Knowledge plus fun is for what you’re yearning. It takes pretty clothes to make a hit . . .

MIAMI UNIVERSITY

see that football would have to be forgotten for the duration of the war. However, Miami, along with many other schools, will continue to make it a major sport.

Last year the University Senate owned a realistic budget, providing for financial aid, to participate in varsity sports. This will help the coaches considerably in developing a team; however, they will have to rely mainly on those men who have not reached draft age. This will be necessary, due to the fact that those men currently in the service will be restricted in their practicing and traveling with the team.

The aim of our coaches will be twofold next year. Not only will they be interested in developing a winning team, but they will be just as interested in conditioning our men for the armed forces. They feel that teaching these men to coordinate together and work as one being on the football field will help them to work as a unit on the battlefield.

So, do not be distressed by rumors that intercollegiate football will be discontinued, for as long as there are enough men left on the campus to make up a core football will be played at Miami.

BASKETBALL

The 1942-43 season marked a new era in Miami basketball, as the college athletic eligibility rules were revised to permit freshmen for the first time in history to participate in varsity competition.

In addition, all male athletes were fortunate to acquire the services of William “Blue” Foster, who, this year, instructed, “Rip” Von Winke as head basketball coach when “Ke” left to serve in the Navy. Coming

VICTOR — COLUMBIA — DECCA RECORDS

here from Newport, Ky., high school. "Blue" left behind him on enviable coaching record, having led his team to several state championships.

There were but four returning lettermen to work with this season, only one of whom was a regular last year, making it necessary for Foster to rely chiefly on the freshman and sophomore talent. After the season got under way, there were two freshmen, Bob Brown, a 6'-5" center, and Elmer Bean, two sophomores, Glen Younger and Ron Casdill, and senior Spencer Tompkins in the starting lineup.

The Redlegs opened the schedule with a bang by turning back Transylvania, Wooster, and Willing-

ton in fast order by the decisive scores of 69-31, 20-47, and 42-30 respectively. The individual scoring in these contests was rather evenly divided with each of the rogers hitting the loop for about seven or eight points.

At this point the Tribe was into their longest losing streak, dropping three consecutive games to Akron, Ball State, and Cincinnati, three of the toughest opponents on their schedule. However, the following week they temporarily returned to their winning ways with a 67-63 victory over Ohio Wesleyan. This was followed by another 62-53 setback at the hands of a powerful Ohio University. Hocking, in the Ohio Wesleyan game fresh-

man guard Elmer Bean chalked up 17 points for the winners.

Miami finally hit her pair with a 71-68 win-

ning streak, the longest of the season. This included two triumphs over Dayton, 57-33 and 42-30, and one each against Oberlin, 54-48, Patterson-Wright, 39-33, and Western Reserve, 65-33. "Blue" outfit finally was
shipped by Ohio University, 61-45, in a thriller that was concluded in the final two seconds of play.

The most point probably marked the high peak of the year, as Tom Strump led the Bobcats by 1.7.47 with a 58-47 win over Ohio Wesleyan at William Clark. Strump threw in 28 points to establish a new individual scoring record at Miami. The last game saw Miami lose to the Cincinnati Bengals, 50-41.

At the close of the schedule statistics showed that Miami had compiled a highly satisfactory record of 10 wins and 6 defeats, while piling up 829 points against 705 for their opponents. One earlier proved to be the Bear's losing season, followed by Bob Brown, Tom Strump, and Red Correll.

Because of the sequence times that saw prevail and the probability that college basketball will be discontinued, it is unnecessary to predict Miami's future possibilities on the hardwood. However, with her present wealth of freshman and sophomore material, Miami should place a top-notch team on the floor next season.

BASEBALL

Despite the myriad difficulties which are first threatened to kill intercollegiate baseball, the Bear's has stood, under the direction of their new leader, William Adams. Fortin. The fact that the Bear's spring to prepare for a schedule which was not completed until last before the start of the season.

A new feature, overlooked by war time restrictions on energy, was the double-header, with four games going the regulation nine innings and half-time abbreviated to seven frames.

5 West High Street

The opening game was played April 10, with the season's finale on May 29 against Ohio State at Oxford. Other out-of-town programs included Ohio University, University of Cincinnati, Wilmington, and Faribault and Bell State of Indiana. At the time of this writing nego-
tiations were also opened for exhibition tests with the Pittsburgh Pirates and in Paul of the American Asso-
ciation, both in spring training at neighboring Indiana towns.

Coach Foster had only three lettermen back from the 1942 team, which swept through its schedule with
only one defeat, but at the hands of the Great Lakes Navy team at a practice encounter. This club, coached
by Walter "Hi" Van Kirk, who is now in the Navy, and
instructor in the Navy, made its season a big testing
with two wins over the Redbirds' old rivals, the U. C.
Beacons.

The three lettermen returning were Bud Thimmes,
Easy Edie Halbert, Bob Krueger, third baseman, and
Big Bob Huston, No. 1 man in the batting order.
Working with these three were a nucleus, former
seemingly to have built up another "good" aggrega-
tion as the season opened.

"Blue" was particularly enthusiastic about his
infants, where he said Good or Bad. Thimmes at slug,
George Kerrmore at second, and Bob Brown and Warren
Clipp moving at third base. This "little defense"
showed up as a speedy formation, but their hitting
ability was questionable. Huston was faced with a prof-
blem in his outfield set-up, which was one big question
mark.

"Sure" Huston and his fireball were destined to do
most of the hitting chores, with Ollin Givel at No. 1

MIAMI UNIVERSITY

relief flogging. Back of the roster were three hefty linemen, Len Viall, Dick Bouchillon and Bob Schenaman.

With practically every member of the team ready to enter the mud once again, each player was expected to give his "all" in an effort to achieve another victorious season for Miami.

TRACK AND FIELD

That Miami rules the midwestern collegiate track and field arena was proved in an victorious 1942 campaign, and an even more promising 1943 season.

Coached by the incomparable, silver haired, George Rife, a group of Redskin track squad opened the 1943 spring season with a smashing triumph in the Butler Relays of Indianapolis.

After participating in a dual meet with the Cincinnati Bears, which the Tribe students captured by a narrow score of 115 to 13, the team traveled west to the Iota-Chase Relays at De Moines, Iowa. Here, in competition with the nation's best track and field performers, the Muscogee's gained national recognition as they won one event and placed in another. Virg Allen diminished Redskin endeavors, upset the Slope lastly by shoveling a heart-breaking sprint to break the top two points in front of Miami's champion Olie Hunter.

Then followed a string of riveting victories over Ohio Wesleyan, Michigan Normal, and Ohio, U. To close the season, the thrice challenged Ohio State Big Ten power house in the State A. U. meet in Cleveland and placed second scoring 100 points.

MIAMI UNIVERSITY

Service calls had depleted a veteran squad when Coach Rider held his first practice for the outdoor track season. Seventeen and Schutt had entered the throwing events. Alton, Hunter and Shew, and the quartet of Alton, Muller, Binney, and Oskey were strong enough to capture the All American A. U. J. junior cross-country meet held over Miami's own windy course.

The return of spring found a large number of this year's track team working out daily under the watchful eye of Coach Rider. Individual stars were few with the exception of Alton, whose record was one of the year's best. Edwyn and Binney standing out and supported by the veterans relay men Evans, Donohoe, Goldin, Schirrle, was back in the high jump and Johnson was the lone veteran hurdler.

The Tadkins made their initial start in the Illinois Relay at Chicago, where they captured second place in a field of 490 contestants.

The Purdue Relay meet was the next step for the fleet red men and with a much larger squad the Ridgemen captured first place in the College division.

The remainder of the season consisted of several dual meets against nearby universities due to limited squad. Problems for the future are dependent entirely on planned recruiting, the facilities and the policies to be followed with regard to service men enrolled at Miami. It is the be

WEIGHT LIFTING

Today, more than ever, physical fitness is being stressed on the Miami campus, to jog the password of Mike is "Physical Fitness." There is no better place to get yourself into condition than the weight room in WHITMORE COURT.

The weight room of our campus is another example of the exceptionally fine equipment that the Physical Education department offers the men of Miami. Competent instructors are constantly on hand to give you assistance in the use of the weights, and how to obtain the greatest results from their use. When you arrive at Miami be sure to make this part of WHITMORE COURT a frequent stopping place on your way to better physical condition.

BOXING

The sport most likely to rise to great heights at Miami this year is boxing. Jay Colville, who teaches the boxing squad, says that due to the Navy V-12
WRESTLING

Wrestling, after several rather lean years, is now becoming a very popular sport with several men. Most of the credit for this rise in interest is due to the efforts of Coach 3d Gillman, former All-American football star from Ohio State. During the wrestling season Coach Gillman worked out regularly with all of the men who were interested and managed to give each man as much individual attention as possible. Wrestling is one of the sports in which no experience is necessary as long as the men who participate always hold any possible wrestling experience.

INTRA-MURAL ATHLETICS

The latter "crani" of inter-collegiate sports, Professor T. P. Hayman, has the ball again this year. With the emphasis on "can't wait all out to build strong bodies as well as the brains to be used in the classes and play the game for Uncle Sam.

Among the various athletics, the Missouri campus are strong and fall branch basketball, soft ball, bowling, tennis, swimming, golf are very well equipped. Shillito's Wardrobe Corner

Shillito's Wardrobe Corner
She has Cook Field which is well groomed and houses five baseball diamonds. The comparatively new and well kept gymnasium is large enough to easily handle three basketball games at once. Bowling is run off at one of the school’s leading key centers, while tennis is played off on any one of Miami’s sets of fifteen cement courts. The annual fall and spring swimming meets are held at the Municipal pool just a short walk from the center of town, and the golf matches are run off on an nine-hole course behind the gym.

Participating in all of the aforementioned athletics are the eleven fraternities and a squad picked from men living in town. Freshman leagues are organized and participation between the two colleges is generally very healthy. Often times the members of the Bone league participate against various fraternity champions.

Men who always wanted to participate in some sort of athletic activity will find their chance to excel here at Miami. Not only will they fulfill their desires, have something to do during their relaxation periods, but they will also be building their bodies for Uncle Sam.

MIAMI UNIVERSITY

OLD MIAMI
Words by President A. H. Upham
Music by R. H. Burke

Oh Miami, from thy hill we call
Thus hast watched the decades roll
While thy sons have quaked from tree
Sturdy bearded pines of all.

Old Miami! New Miami!
Days of old and days to be
Was the song of thy glory,
Our Miami, here’s to thee!

These shall stand a constant beacon,
Crested towers against the sky.
Man shall never seek thy glory,
Power like thine shall never die.

MIAMI MARCH SONG
Words and Music by R. H. Burke

Miami old, to thee our love we bring,
To thee our hearts and minds will ever cling.
Thy home of other days, thy gift so true.
Call us today to sing our praise to thee.
Chorus
Love and honor to Miami,
Our college old and grand.
Profoundly we shall ever hold thee
Over all the land.
Alma Mater now we praise thee,
Sing joyfully this lay.
Love and honor to Miami
Forever and a day.
