Chart your own path

Entrepreneurial thinking — adapting to a changing world, knowing when to take calculated risks, learning from mistakes — is a mindset. It applies to every field of study and every profession. You'll learn it here.

LEAD WITH PURPOSE You possess the power to lead. To determine strategy, inspire others, and create something new. Never tried it? We can help you find your inner leader. Already on the exec board for all your activities? Let's take it to the next level. Through student organizations, client-driven projects, and team-based academic competitions, you'll have countless opportunities to exercise your leadership muscles. We even have several centers and institutes dedicated to developing future leaders.

“We want you to know your talents and how to articulate them to a recruiter. We also want you to learn to recognize the value in what other people bring, because nobody else teaches that.”

DR. MEGAN GERHARDT
Professor and Co-Director,
William Isaac and Michael Oxley Center for Business Leadership
