

MASTER'S IN ECONOMICS

ONE YEAR PROGRAM

The Miami Master's program is designed to be completed in one year and prepares students for employment or the pursuit of a Ph.D. in economics. Course work occupies the fall and spring semesters. During the summer, students may work with a faculty supervisor on a thesis, or work with a team of students on a research project.

"In my role with Worldpay, I have been responsible for the global integration of three lines of business into one following an \$11B merger of rival payments companies. The integration work was fraught with challenges and yet fascinating and rewarding as we solved numerous complex problems to design a global sales process that accommodates a variety of unique requirements. My experience in the rigorous MA Econ program was invaluable to the development of my ability to think critically, synthesize complex information, and solve problems with limited instruction. If I think about my day to day in the corporate world, those are three of the leading skills I leverage in order to progress my career."

Charlotte Smith, Miami MA 2016
