

**Miami University**  
**Educational and Career Placement – Post-Graduation Follow-Up**  
**Oxford Campus Bachelor's Degree Recipients**

- The Offices of Career Services and Institutional Research collaborated to collect placement information for alumni who graduated in 2012-2013 with a bachelor's degree from the Oxford campus.
- The Office of Career Services called all alumni for whom we did not have placement data, reaching out to over 2,000 alumni between August and November of 2013. Ultimately, data from five different sources was used to identify alumni placement (details below).
- Educational placement data were found for 100% of alumni while career placement data were found for 56% of alumni. Information on alumni's current state/country of residence was also obtained for 71.6% of alumni.

**Educational Placement**

- The educational placement data were obtained from the National Student Clearinghouse (70.7%), Alumni LinkedIn profiles (17.5%), the Career Services phone survey (8.5%), and Miami University's Banner data system (for alumni who were currently enrolled at Miami) (3.2%).
- 18.6% of alumni were currently enrolled in school, including 7.1% who were enrolled at the master's level and 3.4% who were enrolled in a doctoral level program.

**Career Placement**

- Career placement data were more difficult to obtain, due to the lack of a national data source such as the National Student Clearinghouse (used for enrollment data). Career Services obtained placement information from 9.0% of alumni through their phone survey and for an additional 17.4% of alumni through publically accessible LinkedIn profiles. In addition, career placement data from the Graduation Survey were available for 29.6% of the alumni.
- 75.2% of alumni were currently employed or had received a job offer while 3.4% were not employed. The remaining 21.4% of alumni indicated at graduation that they did not plan to seek employment (e.g., due to pursuit of additional schooling).
- Combined, 91.1% of alumni were either employed, enrolled in school, or both.
- 52.1% of alumni were working full-time in their field of study while 15.4% were working full-time outside their field of study.
- 19.3% of alumni had been employed by their current employer previously, most commonly as an intern or co-op student.
- The majority of employed alumni receive a salary between \$30,000 - \$49,999 per year; 10.9% of alumni earn from \$30,000 - \$39,999 per year, 19.6% earn from \$40,000 - \$49,999 per year, and 32.2% earn from \$50,000 - \$59,999 per year.

**State/Country of Residence**

- Current state/country of residency was obtained for 71.6% of alumni, with data coming from the Career Services survey (9.0%), LinkedIn profiles (17.8%), and the Graduation Survey (44.7%).
- 52.3% of alumni were living in Ohio while 45.1% were living in a different U.S. state. Illinois was the second most popular location, with 13.3% of alumni living there.
- The remaining 2.6% of alumni were living in American territories or foreign countries.
