First Destinations Methodology

Methodology

The First Destinations report provides placement information on students who graduated during the 2017-18 academic year. Placement results are based on graduates' primary activity after graduation and align with National Association of Colleges and Employers (NACE) First Destination guidelines. National comparison data will be available from NACE in October.

First Destination data are based on variety of data sources, including online surveys, phone surveys, national databases, data from Miami University offices, direct employer confirmation, and public sources. Results are not publicly available for majors that have placement data for only a small number of graduates (n < 10).

Graduates must be employed, serving in the military, serving in a volunteer or service program, or enrolled by Dec. 31, 2018 in order to count as successfully placed. Consistent with the National Association of Colleges and Employers (NACE) First Destination guidelines, the success rate calculation excludes alumni who are not seeking employment or education from the denominator. However, alumni who are not seeking employment or education are included when calculating the individual primary activities (e.g., percent employed, percent continuing education).

The full methodology and results are available in the 2017-2018 Oxford Campus Bachelor's Graduates report, available on the Office of Institutional Research & Effectiveness website at miamioh.edu/oir/alumni.

Questions can be directed to the Office of Institutional Research & Effectiveness at InstitutionalResearch@MiamiOH.edu or 513-529-1662.
