

## DNP Practicum Hours Plan

### NSG 722

#### Personal Information:

- Name: \_\_\_\_\_
- Unique ID: \_\_\_\_\_
- DNP Program Start Date: \_\_\_\_\_

Course:

NSG 722 DNP Project Course I

The table below lists predicted hours that will be spent on activities in the first DNP Project Course. It is anticipated that some of your practicum hour will be under direct guidance of your DNP mentor, while others will be more independent. Some projects may need more time than others, and therefore the student will have more opportunity to immerse into the organization and with their mentor on non-DNP project experiences. Other students may have a more involved project, and hours may focus more heavily on the DNP Project implementation.

Students should collaborate with their DNP mentor to create a plan for their immersion hours that must meet a total of 105 hours by the end of the semester. The plan should include anticipated non-DNP project experiences and their target hours. As the semester proceeds, student should keep track of these hours, and add any additional experiences and respective hours that they accrued in their NSG 722 course.

The form must be submitted to the student's DNP Advisor and Graduate Nursing Director at the end of the semester.

Activity	Target Practicum Hours	Actual Practicum Hours
Develop Project Ideas and Design	22	
Research and synthesize topic background, purpose and research question	30	
Synthesize ideas and refine Chapter 1: Introduction	15	
IRB Training	8	
Orientation and integration to facility/ participation in leadership opportunities	15	
Total	105
