

DNP Practicum Hours Plan

NSG 726

Personal Information:

- Name: _____
- Unique ID: _____
- DNP Program Start Date: _____

Course:

NSG 726 DNP Project Course III

The table below lists predicted hours that will be spent on activities in the final DNP Project Course. It is anticipated that some of your practicum hour will be under direct guidance of your DNP mentor, while others will be more independent. Some projects may need more time than others, and therefore the student will have more opportunity to immerse into the organization and with their mentor on non-DNP project experiences. Other students may have a more involved project, and hours may focus more heavily on the DNP Project implementation.

Students should collaborate with their DNP mentor to create a plan for their immersion hours that must meet a total of 105 hours by the end of the semester. Predicted hours may be adjusted, but total hours must meet the 105-hour minimum by the end of the semester. The plan should include anticipated non-DNP project experiences and their target hours. As the semester proceeds, student should keep track of these hours, and add any additional experiences and respective hours that they accrued in their NSG 726 course.

The form must be submitted to the student's DNP Advisor and Graduate Nursing Director at the end of the semester.

| Activity | Target Practicum Hours | Actual Practicum Hours |
|---|------------------------|------------------------|
| Synthesize ideas and refine Chapter 4: Discussion | 50 | |
| SQUIRE Manuscript | 20 | |
| Scholarly Poster | 20 | |
| *Enter alternative experience | 15 | |
